OAUTHC SCHOOL OF NURSING PAST QUESTIONS AND ANSWERS ENTRANCE EXAMINATION, 2015

SUBJECT: ENGLISH LANGUAGE

INSTRUCTION:

Read the following instruction carefully.

1. Use an HB pencil to shade in your answer, ensure that any shading error is thoroughly erased.
2. Attempt all questions. Each candidate must submit the answer sheet with the question paper
3. The use of calculator and/or similar electronic devices is NOT allowed.

SECTION A:

From the words lettered A D choose the word which best completes each of the following sentences,

1. The solution to the problem is happily _____ (a) at hand (b) on hand (C) within hand (d) near hand
2. My grandmother told a story that made me _____ (a) laughing (b) laugh (c) laughed (d) to laugh
3. The principal with all the teachers and students _____ (a) has arrived (b) were arriving (c) have arrived (d) were to arrive
4. The triplets love _____ very much (a) each other (b) one another (c) the other (d) the others
5. The man asked if she her face (a) have run (b) had ran (c) have ran (d) had ran
6. Please _____ the light before you sleep (a) extinguish (b) put out (c) put off (d) switch off
7. The woman _____ the sharp knife from the baby in a subtle way (a) wrested (b) rested (c) wrestled (d) arrested

INSTRUCTION: After each of the sentences below a list of possible interpretation of all or part of the sentence is given. Choose the interpretation that you consider most appropriate for each sentence.

8. The elders felt it was a forlorn hope and vehemently opposed It (a) a dangerous (b) a plan which would not favour the elder (c) a planless course of action (d) a plan which had very little likelihood of success
9. The sword of Darnodee will be hanging over the council if that party gain control (a) the of justice (b) imminent danger in the midst of prosperity (c) the man's influence (d) the curse of God
10. Bisi stole a march on us by beating the gun at the race (a) gained an advantage (b) came last (c) came first (d) was disqualified
11. Because the principal still refused his permission his staff finally took the bit between their teeth (a) carried placards (b) got out of control (c) tore up the timetable (d) refused to go to work
12. I took time by the forelock and succeeded in getting a scholarship (a) used force (b) did a clever thing (c) acted promptly (d) used a cunning means
13. I laughed up my sleeve as he told the tales of his exploits (a) was openly making fun of him (b) was very pleased (c) laughed (d) was secretly amused

INSTRUCTION: From the words lettered A D, choose the word or group of words that is nearest in meaning to the underlined expression as it is used in the sentence.

14. The rioters despoiled the main markets (a) looted (b) destroyed (c) burnt (d) desecrated
15. What happened last night was a novelty (a) a happy occurrence (b) a usual occurrence (c) an unusual occurrence (d) a sad occurrence
16. Some people believe that it is ominous for the dog to bark at night (a) giving an evil (b) frightful (c) sad (d) evil
17. In a section of the town many people were living in abject poverty (a) degraded (b) worthless (c) shameless (d) objectionable
18. The contribution of the engineer was priceless (a) invaluable (b) worthless (c) nice (d) exorbitant
19. The young man surmounted all the oppressive measures to break his will (a) overcame (b) fought (c) renounced (d) defeated

Read the passage below and answer question 20 24 that follows

The premise behind the question seems to be that if one does not unhesitatingly assert belief in evolution, then one must necessarily believe that God created the world and everything in it in six 24-hour days. But limiting this question to a stark choice between evolution and creationism does a disservice to the complexity of the interaction between science, faith and reason.

The heart of the issue is that we can not drive a wedge between faith and reason. I believe wholeheartedly that there can not be any contradiction between the two. The scientific method, based on reason seeks to discover truths about the nature of the created order and how it operates, whereas faith deals with spiritual truths. The truths of science and faith are complementary; they deal with very different questions, but they do not contradict each other because the spiritual order and the material order were created by the same God.

People of faith should be rational, using the gift of reason that God has given us. At the same time, reason itself cannot answer every question. Faith seeks to purify reason so that we might be able to see more clearly, not less faith supplement the scientific method by providing and understanding of values, meaning and purpose.

More than that, faith-not-science can help us understand the breadth of human suffering or the depth of human love. Faith and science should go together, not be driven apart.

The question of evolution goes to the heart of this issue. If belief in evolution means simply assenting to microevolution, small changes over time within a species, I am happy to say, as I have in the past, that I believe it to be true. If on the other hand, it means assenting to an exclusively materialistic, deterministic vision of the world that holds no place for a guiding intelligence, then I reject it.

20. In this passage, the writer seeks to (a) portray the superiority of science over faith (b) show the compatibility of faith and science (c) show the complexity of evolution and creationism (d) show the contradictions of faith and reason
21. The writer's attitude to the subject of the passage could be described as (a) cynical (b) ambivalent (c) disapproving (d) conciliatory
22. From the passage, which of the following does the writer support? (a) evolutionary changes within a small group of organisms (b) the creation of the world in a six 24-hour day (c) without the scientific method, faith cannot be practiced (d) those who believe in creation cannot be good scientists
23. A possible title for this passage is (a) the absurdity of faith without reason (b) science, faith and reason (c) the complementarity of evolution and creation (d) a deterministic vision of the world

24. Which of the following idea is NOT true according the passage? (a) both science and faith express various truths (b) to believe in evolution is to deny the existence of God (c) the world could be better understood by bridging the gap between reason and faith (d) both science and faith express various truths

INSTRUCTION: From the words lettered A D, choose the word or group of words that is nearest in meaning to the underlined expression as it is used in the sentence.

25. Do you know that the ____ is different from the latter? (a) former (b) beginning (c) latest (d) later

26. While some animals are still extant, some are today (a) distant (b) intant (c) extinct (d) domestic

27. Your brother always speaks euphemistic words to address us but it is characteristic of your sister to speak _____ words to us (a) few (b) rash (c) harsh (d) police

28. While some activities are enervating some other activities are ____ (a) invigorating (b) exacerbating (c) immunizing (d) embarrassing

29. We expect the boy to show remorse for the offence he committed, but he remained ____ to the surprise of all (a) indifferent (b) respectful (c) unrepentant (d) reserved

30. Whereas Bello's behaviour is erratic, Tito's manner of doing things is ____ (a) predictable (b) allergic (c) assertive (d) eccentric

GENERAL PAPER

INSTRUCTION: From the words lettered A D choose the appropriate answer.

1. Which of the following is not a general characteristic of waves? (a) diffraction (b) polarization (c) reflection (d) refraction
2. The thermometric substance of an absolute thermometer is (a) platinum (b) mercury (c) alcohol (d) helium
3. Which one of the following has the highest specific heat capacity? (a) water (b) liquid hydrogen (c) copper (d) lead
4. Which of the following sources of energy is non-renewable? (a) tides (b) solar (c) ocean waves (d) biomass
5. What type of electromagnetic radiation can be used to take photographs in the haze? (a) radio waves (b) visible rays (c) ultraviolet rays (d) infrared rays
6. The difference in mass number (A) of atoms of the same element is due to a difference in (a) proton number (b) number of electrons (c) neutron number (d) proton and electron number
7. A man hears his echo from a nearby hill 2 seconds after he shouted. If the frequency of his voice is 250Hz and the wavelength is 1.20m, how far away is the hill? (a) 21.3m (b) 31.5m (c) 335m (d) 340m
8. The colour of the positive column in a gas discharge tube is characteristic of the (a) gas and the coating in the tube (b) pressure of the gas only (c) temperature of the gas only (d) pressure and potential difference
9. Which of the following pairs of particles each have the same number of electrons as argon? [Ar = 18] (a) Li and F (b) Na and F (c) Na and F⁴⁻ (d) and Cl
10. A mixture of 0.20 mole of Ar 2.20mole of Na and 0.30 mole of He exerts a total pressure of 2.1 atmosphere. What is the partial pressure of He in the mixture? (a) 0.70 atmosphere (b) 0.80 atmosphere (c) 0.90 atmosphere (d) 0.65 atmosphere
11. The p^{H} of a solution is 12.23; calculate the hydrogen ion concentration of the solution (a) 1.52×10^{-2} (b) 1.69×10^{-2} (c) 1.74×10^{-2} (d) 1.87×10^{-2}
12. Which of the following is an artificial element? (a) plutonium (b) lanthanum (c) uranium (d) lutetium
13. One common fraction may be represented ironically by the equation $\text{Ba}^{2+} + \text{SO}_4^{2-} \rightarrow \text{BaSO}_4$ this occurs during (a) hydrolysis (b) synthesis (c) thermal association (d) double decomposition
14. White phosphorous is stored under water because it (a) is corrosive (b) is corrosive (c) reacts with carbon (iv) oxide (d) is hydrolyzed by atmospheric moisture
15. When aluminum tetraoxosulphate (iv) reacts with excess sodium hydroxide, the formula of one of the compounds formed is (a) AlNaO_2 (b) Al(OH)_3 (c) NaAl(OH)_4 (d) Na_3AlO_3
16. An alloy of copper and tin used in electrical contacts is (a) brass (b) solder (c) bronze (d) type metal
17. Kerosene and petrol (gasoline) are (a) hydrocarbons with kerosene having bigger molecules (b) hydrocarbons with petrol having bigger molecules (c) hydrocarbons with the same size molecules but of different shape (d) compounds of carbon and hydrogen and sulphur for kerosene, but nitrogen for petrol
18. The preparation of ethoxyethane ($\text{C}_2\text{H}_5\text{OC}_2\text{H}_5$) from ethanol can be considered as (a) dehydration (b) oxidation reactions (c) hydrolysis reactions (d) dehydrogenation reactions.

19. Which of the following gives the correct formula of the fatty acid present in palm oil? (a) $\text{CH}_3(\text{CH}_2)_{14}\text{COOH}$ (b) $\text{CH}_3(\text{CH}_2)_{16}\text{OOOH}$ (c) $\text{CH}_3(\text{CH}_2)_{15}\text{COOH}$ (d) $\text{CH}_3(\text{CH}_2)_{17}\text{COOH}$
20. Glycerol had the typical properties of (a) an acid (b) a base (c) an alcohol (d) an ester
21. A certain natural product contains the ester glycerol palmitate soap can be made from this by (a) passing over activated charcoal (b) boiling with sodium hydroxide (c) mixing with hydrogen (d) heating with glycerine
22. Which of the following is NOT a thermosetting plastic? (a) terylene products (b) phenol methanol products (c) carbomide methanol products (d) malemine methanol products
23. The trajectory of a projectile motion is (a) ellipsoidal (b) parabolic (c) parabolic (d) spherical
24. A body accelerates from rest with an acceleration of 8ms^{-2} for 10 seconds. Calculate the distance converted in the 10th second (a) 76m (b) 97m (c) 324m (d) 400m
25. Which of the following infection is unlikely to respond to antibiotics treatment? (a) tetanus (b) measles (c) typhoid fever (d) ringworm
26. Pest can be controlled without the subsequent danger of polluting the ecosystem by (a) spraying the ecosystem with pesticide (b) keeping the population of natural enemies constant (c) increasing the population of natural enemies of the pest (d) eliminating the natural enemies of the pests
27. Autotrophs are also describes as (a) consumers (b) carnivores (c) producer (d) decomposers
28. Which of the following bones is NOT a component of the appendicular skeleton? (a) tibia (b) sacrum (c) radius (d) humerus
29. If two parents are sickle cell carries then their genotypes would be (a) $\text{Hb}^A \text{Hb}^A$ and $\text{Hb}^A \text{Hb}^A$ (b) $\text{Hb}^s \text{Hb}^s$ and $\text{Hb}^s \text{Hb}^s$ (c) $\text{Hb}^A \text{Hb}^A$ and $\text{Hb}^s \text{Hb}^s$ (d) $\text{Hb}^A \text{Hb}^s$ and $\text{Hb}^A \text{Hb}^s$
30. Procaryotic cells are found in (a) monerons (b) algae (c) tracheophytes (d) spirogyra
31. The correct order of classification of human being is (a) animalia, chordate, vertebrata, mammalie, primate, hominidate, homo and sapiens (b) animalia, vertebrata, mammalie, chordate, primate, homo, sapiens and hominidee (c) chordate, animalia, vertebrata, mammalie, primate, hominidate, and sapiens (d) animalia, chordate, vertebrata, primate, mammalian, homo and sapiens
32. Deficiency of sulphur causes (a) poor, weedy growth (b) extremely stunted growth (c) yellowing of leaves stems become slender (d) weak, stunted growth
33. Vitamin K is important in the (a) formation of enzymes involved in synthesis of amino acid (b) formation of red blood cells (c) synthesis of blood clotting factors (d) formation of co-enzymes involved in cellular respiration
34. The following are the components of nucleotides except (a) a five- carbon sugar (b) a six- carbon sugar (c) a phosphate group (d) an organic nitrogen-containing
35. Which of the following inherited conditions usually shows incomplete dominance? (a) baldness (b) tongue rolling ability (c) haemophilia (d) sickle cell anaemia
36. Which of the following is not a theory under Darwin's theory of organic evolution (a) over production (b) struggle for existence (c) mutation (d) offspring show variations
37. Which of the following does not cause mutation? (a) x-rays (b) mutant (c) ultra-violet light (d) cosmic radiation

38. Which of the following organisms has homodont dentition? (a) a lizard (b) sheep (c) cat (d) man
39. Which of the following habitats cannot be used for the study of succession? (a) a pond (b) savanna grassland (c) well cultivated land (d) abandoned farm land
40. Which of the following statement is/are correct
- One mole of sodium atoms contains 6.02×10^{23} atoms and weighs 23g
 - One mole of magnesium atoms contains 6.02×10^{23} atoms and weighs 24g
 - One mole of oxygen atoms contains 6.02×10^{23} atoms and weighs 16g (a) i and ii (b) ii and iii (c) i and iii (d) i, ii and iii

OAUTHC SCHOOL OF NURSING PAST QUESTIONS AND ANSWERS

ENTRANCE EXAMINATION, 2016

SUBJECT: ENGLISH LANGUAGE

INSTRUCTION:

Read the following instruction carefully.

1. Use an HB pencil to shade in your answer, ensure that any shading error is thoroughly erased.
2. Attempt all questions. Each candidate must submit the answer sheet with the question paper
3. The use of calculator and/or similar electronic devices is NOT allowed.

From the options A D, choose the word that has the same sound as the one underlined.

1. Poor (a) more (b)tore (c) dour (d) door
2. Great (a) cake (b) break (c) team (d) beam
3. Clothe (a) cloth (b) tooth (c) wordy (d) forth
4. Sing (a) goose (b) game (c) banged (d) jungle
5. Machine (a) chancellor (b) bishop (c) character (d) measure

From the option A D provided, choose the one nearest in meaning to the underlined word(s)

6. Many tourists say this country has a bracing climate (a) harsh (b) invigorating (c) benevolent (d) same
7. After the race, some of the athlete felt completely done in (a) strained (b) satisfied (c) disappointed (d) exhausted
8. My sister's husband is very fastidious about his food (a) careful (b) hygienic (c) ravenous (d) particular
9. Because the student failed to obey the regulation restricting movement in the school compound, he was expelled.
(a) answer (b) observe (c) notice (d) understand
10. Peter's breathing soon became difficult in the thin air of the hills, and there had to be regular pauses for recreation (a) rewarded (b) rest (c) recovery (d) restoration

From the words lettered. A D, choose the interpretation that gives the correct meaning of the idiom in the sentence or phrase

11. The teacher said that it was bad to cook the books. This means to (a) write good books for the public to read and enjoy
(b) falsify figures (c) dishonesty (d) willfully destroy a document which contains vital information (d) publish books as a means of living
12. He is in the first flight of footballers, this means he is (a) in the first team (b) always the first footballer to score a goal (c) among the best footballers (d) the first footballer to run away from camp
13. To say that "a rolling stone gather no moss" means (a) an unsteady person is bound to encounter failure (b) a young person cannot succeed easily in life (c) a person who runs every time cannot live long (d) it is not good to make a stone roll
14. Osazee scored a brilliant hat trick in the final match of the world cup
fiesta. This means that he, (a) won the prize for the best player (b) failed to score the winning goal (c) had a hat on during the game (d) scored three successive goals in the match
15. The judge 'had his hands tied' in the case in which his son was arraigned for a charge of murder. This means that the judge (a) was withdrawn from the case (b) was handcuffed while the trial lasted (c) could not help convicting his son (d) was conspicuously partial

In the following sentence, choose from the options A D that best completes the sentences.

16. Among the books in the library, he found ____ Bible. (a) an old family brown leather (b) an old brown leather family (c) a brown leather old family (d) an old leather brown family
17. The poor man lived in ____ house. (a) an old mud-brick large broken down (b) a large old mud-brick broken down (c) a large old broken down mud-brick (d) a broken-down old large mud-brick
18. The man donated a ____ machine to our school (a) modern duplicating large red (b) modern large red duplicating (c) large modern red duplicating (d) red duplicating large modern

19. The beauty pageant was won by a ____ girl (a) beautiful dark and tall (b) tall dark and beautiful (c) dark tall and beautiful (d) beautiful tall and dark
20. The house ____ the kidnappers were kept is being watched by the police (a) which (b) where (c) in where (d) of which
21. A respectable person should not ____ on an agreement. (a) renege (b) disagree (c) honour (d) dispute
22. The little boy ____ to the occasion when he was asked to make a speech at his mother's funeral. (a) rose (b) lifted (c) stood (d) fell
23. Do you know the story about the ____ (a) the president's of Nigeria plane (b) the president's plane of Nigeria (c) the president of Nigeria's Plane (d) the plane of the president's of Nigeria

Read this passage carefully and then answer the question that follow:

There is always a hustle and bustle of people in a typical city, especially at closing period when shops and offices were closing and workers were hurrying home, some in their private cars, others trying to catch a commercial vehicle, while those who couldn't stand the rush to enter a bus or a cab jump on motorcycles popularly called okada. It was at the peak of that rush hour that Oshoke arrived in Lagos.

Oshoke had never seen so many people on the streets or so many vehicles on the road, and so when he dropped at the popular Yaba bus stop, he felt suddenly lost like a man lifted from the ground without any warning or explanation.

Another observation that stupefied him was not just the number of motorcycles that move like a swarm of ants, but the way each rider appears to be oblivious of any other vehicle or human being around them, posing a grave danger to life.

In his stupor, somebody tapped his shoulder and all of a sudden, he left empty, the way a young woman feels when her skirt unexpectedly falls in the middle of a busy street. But he managed to turn to meet the hard cold eyes of a man glaring at him, 'what is the problem?' the voice reminded him of a lions roar. As Oshoke later admitted it was a perfect voice with which to wake a dead man.

Oshoke was later to learn from the stranger that the taxis had the worst drivers even though drivers generally in the cities see every other driver as a rival on the road an enemy to be conquered. One minute they would be overtaking other cars, the next stopping in the middle of the road to pick up fares without any signal to other drivers or road users of their intentions.

Pedestrians seemed always in danger of their lives as they tried to run across the road whenever there was a lull in the traffic.

24. How did Oshoke feel as he arrived in Lagos (a) he was so elated that he felt he was walking on air (b) he became so nervous at once (c) he was simply dazed (d) he was brimful of composure
25. Why was Oshoke bewildered? (a) he thought the stranger would attach him (b) he suddenly felt cold (c) the rowdiness of Lagos (d) he was frightened because of the car and people in Lagos.
26. According to the passage, the commuters (a) were confused (b) were very wicked (c) were irrational (d) lack discipline
27. According to the passage (a) passenger are always in danger of crossing the road (b) fares are always in danger of being knocked down (c) people are always in danger crossing the road (d) people are always crossing the road.
28. From the passage, we can infer that all road users (a) need education (b) must be directed (c) need the right orientation (d) need to be monitored by the police

From the words lettered A D, choose the word or group of words that is opposite in meaning to the underlined word or group of words.

29. Girls these days dress provocatively but the culture requires ____ dressing (a) prodigious (b) preventive (c) modest (d) productive
30. He did the work perfunctorily instead of (a) perfectly (b) carefully (c) permanently (d) especially

GENERAL PAPER

INSTRUCTION: From the words lettered A D choose the appropriate answer.

1. Which of the following best describes viruses? (a) they grow only inside living cells (b) they possess only characteristics of living things (c) they can grow on dead cells (d) they cannot be crystallized.
2. Loss of nitrogen in the soil is caused by a process known as (a) putrefaction (b) nitrogen fixation (c) denitrification (d) nitrification
3. Which of the following represents the Watson-Crick DNA base pair model? (a) G-T (b) T-C (c) T-A (d) G-A
4. The liver performs all the following functions EXCEPT (a) regulation of heat (b) formation of cholesterol (c) removal of red blood cells (d) synthesis of vitamins
5. All but ONE of the following are atmospheric pollutants (a) diesel (b) carbon II oxide (c) sulphur(IV) oxide (d) hydrogen sulphide
6. On what part of the tongue do we perceive salty taste? (a) front (b) sides (c) back (d) sides and front
7. Maintenance of homeostasis in mammals is a function of all the following except (a) ovaries (b) skin (c) lungs (d) kidneys
8. Biotechnology has helped to produce plants and animals of these desirable features, EXCEPT (a) greater resistance to pest and diseases (b) higher susceptibility to infections (c) better nutritional value (d) early yielding varieties
9. Insects which undergo complete metamorphosis are those that (a) have the four distinct stages in their life cycle (b) do not have the larval stage (c) have larva stage and pupa which resemble the adult (d) their eggs hatch to produce nymphs
10. The type of storage organ found in ginger is called (a) bulb (b) cutting (c) tuber (d) rhizome
11. The geotropic response of a seedling is detected with (a) clinostat (b) thermostat (c) a seach disc (d) an auxanometer
12. The substrate in cellular respiration is (a) sucrose (b) glucose (c) glycogen (d) adenosine diphosphate
13. Good example of roughage containing food material is (a) orange juice (b) corn flower (c) carrot (d) egg yolk
14. The World Health Organization defines good health as (a) a state of physical and mental well-being (b) the absence of deformities (c) absence of diseases (d) a state of physical, mental and social well-being
15. The state at which chromosomes move towards the opposite poles during mitosis is (a) prophase (b) metaphase (c) telophase (d) anaphase
16. Which of the following can sublime (a) water (b) ink (c) iodine (d) hydrogen
17. A certain compound on analysis gave 2.02g of carbon, 0.35g of hydrogen and 2.68g of oxygen. If the molecular mass is 90, calculate the molecular mass (a) CH_2O (b) $\text{C}_2\text{H}_4\text{O}_2$ (c) $\text{C}_3\text{H}_6\text{O}_3$ (d) $\text{C}_4\text{H}_8\text{O}_4$
18. Isotopy is due to differences in the number of (a) atomic mass (b) molecular mass (c) protons (d) neutrons
19. Chlorine is a — (a) colourless gas (b) greenish liquid (c) yellow gas (d) greenish yellow gas
20. Calcium carbide reacts with water to form ethyne, what mass of calcium carbide (grams) would react to give 1.12 dm³ of ethyne at STP? [Ca, 40, C 12, H 1] (a) 60g (b) 64g (c) 32g (d) 32g
21. 5.3g of silver nitrate (V) was dissolved in 50 cm³ of water at 25°C. Calculate the solubility of the salt in mol dm³ [Ag = 108, n = 14, O = 16] (a) 0.312 mol dm³ (b) 0.031 mol dm³ (c) 0.062 mol dm³ (d) 0.623 mol dm³
22. Which of the following decompositions are correct?
(a) $\text{Ag}_2\text{CO}_{3(s)} \longrightarrow \text{Ag}_2\text{O}_{(2)} + \text{CO}_{2(g)}$
(b) $2\text{PbCO}_{3(s)} \longrightarrow 2\text{Pb(s)} + 2\text{CO}_{2(g)} + \text{O}_{2(g)}$
(c) $2\text{NaNO}_{3(s)} \longrightarrow 2\text{NaNO}_{2(s)} + \text{O}_{2(g)}$
(d) $\text{Ag}_2\text{CO}_{3(s)} \longrightarrow \text{AgO}_{(s)} + \text{CO}_{2(g)}$
23. In the reaction of aqueous solution of HCL and NaOH, the heat change is heat of (a) solution (b) neutralization (c) formation (d) displacement
24. Which of the following gas is colourless and odourless? (a) NO_2 (b) N_2O (c) CO_2 (d) a and c
25. The two hydrocarbon used as lower and upper standards for petrol are (a) isooctane and benzene (b) heptane and acopenatane (c) heptane and 2,2,4 trimethylpentane (d) heptane and acopenatane
26. Benzene community undergoes ___ reactions (a) addition (b) elimination (c) substitution (d) amendment
27. Under high pressure, real gasses deviate from compliance with gas laws because their molecules (a) experience repulsive forces (b) have become more energetic (c) have become less energetic (d) collide inelastically

28. Which of the 3d, 4s, 4p, 4d has the lowest energy? (a) 3d (b) 4s (c) 4p (d) 4d
29. One of the causes of algae growth in rivers is the presence of (a) heavy metals (b) pesticides (c) phosphates from detergents (d) high particulate loading
30. Phenolphthalein solution at pH 2.5 is (a) yellow (b) pink (c) red (d) colourless
31. Which of the following is a vector quantity? (a) distance (b) speed (c) energy (d) weight
32. Calculate the work done by a bricklayer who lifted cement block of mass 10kg from the floor to a height of 2.5m (acceleration due to gravity 9.8ms^{-2}) (a) 294.0J (b) 215.0J (c) 30.0J (d) 25.0J
33. Find the potential energy of a diver of mass 75kg at a height of 10m above a swimming pool (acceleration due to gravity = 9.8m/s^2) (a) 7.35KJ (b) 9.41 KJ (c) 8.82KJ (d) 0.75KJ
34. Determine the wavelength of fundamental note of a guitar string of length 65cm long (a) 65cm (b) 260cm (c) 195cm (d) 130cm
35. Find the combined resistance of two wires each of resistance 8-ohms when they are connected in parallel (a) 16-ohms (b) 4-ohms (c) 20ohms (d) 12-ohms
36. A force of 300N was used to pull a load of mass 40kg at a steady speed up an inclined of length 6.2m and vertical height 3.5m. Determine the velocity ratio (a) 0.57 (b) 1.31(c) 1.57(d) 1.77
37. Which of the following is NOT TRUE about pressure (a) Unit of pressure is Nm^{-1} (b) pressure in a liquid increases with depth (c) pressure at any point in a liquid acts in all directions (d) pressure in the ratio of force acting normally per unit area.
38. 120cm³ of gas was collected at 20°C and 745mm of mercury pressure. Find the volume of gas at standard temperature and pressure (a) 1605.7cm³ (b) 917.8cm³ (c) 305.1cm³ (d) 109.6cm³
39. A metal of length 30cm is heated until its temperature rises by 60°C to a new length of 30.04cm. Calculate its linear expansivity (a) $4.44 \times 10^{-5} \text{K}^{-1}$ (b) $22.22 \times 10^{-5} \text{K}^{-1}$ (c) $3.33 \times 10^{-5} \text{K}^{-1}$ (d) $1.52 \times 10^{-5} \text{K}^{-1}$
40. Which of the following statements is NOT correct? (a) molecules of a liquid are stationary (b) atoms combine to form molecules (c) the molecules of matter are in constant motion (d) Brownian motion is an evidence of particle nature of matter.
41. Determine elastic constant of a spring if a force of 1 N stretches it by 2.7cm (a) 0.4Nm⁻¹ (b) 40.4Nm⁻¹ (c) 37.0Nm⁻¹ (d) 40.0Nm⁻¹
42. Which of the following objects is NOT in stable equilibrium? (a) a car with wide base and low centre of gravity (b) a ball in the middle of a bowl (c) a car with narrow base and high centre of gravity (d) a cone resting on its base
43. Which of the following is not true of boiling? (a) temperature is constant during boiling (b) occurs throughout the entire volume of the liquid (c) takes place at all temperatures (d) it is change from liquid in vapour at the boiling point
44. A swimming pool viewed directly from above its surface appears to be 12m deep. Find the real depth. (refractive index of water (a) 16m (b) 20m (c) 10m (d) 24m
45. A transformer has 500 turns in the primary coil and 400 turns in the secondary coil. Find the voltage in the secondary coil when the primary coil is connected to a 2.20V main (a) 132V (b) 160V (c) 176V (d) 182V

OAUTHC SCHOOL OF NURSING PAST QUESTIONS AND ANSWERS

ENTRANCE EXAMINATION, 2017

Time Allowed: 1h 15mm

INSTRUCTION: Read the following instruction carefully.

1. Use an HB pencil to shade in your answer, ensure that any shading error is thoroughly erased.
2. Attempt all questions. Each candidate must submit the answer sheet with the question paper
3. The use of calculator and/or similar electronic devices is NOT allowed.

SECTION A: ENGLISH

INSTRUCTION: Choose the word or group of words that is nearest in meaning to the underlined expression as it is used in the sentence.

1. He has been inundated with work (a) over whelmed with (b) unhappy with (c) unconcerned about (d) interested in
2. The Vice Chancellor has approved a new allowance, an incentive for all the lecturers. (a) an advance (b) a package (c) an encouragement (d) a reward
3. Although the speech was impromptu it was very well received (a) prepared (b) advertised (c) read out (d) not prepared for
4. My appeal to the lecturer for help was futile (a) successful (b) accepted (c) without success (d) realistic
5. What happened last week at the meeting vindicated my earlier position (a) disagreed with (b) proved (c) dismissed (d) voided
6. Tonia was accused of immodest dressing (a) loud (b) poor (c) indecent (d) costly
7. Let me tell you, David is one student with an impeccable character (a) faultless (b) bad (c) interesting (d) deviant

INSTRUCTION: Choose the word or group of words that is opposite in meaning to the underlined expression as it is used in the sentence.

8. He was very discreet about the number of university entrance examinations he was written (a) secretive (b) open (c) sure (c) uncertain
9. Ofure told the congregation that she married a doting man (a) a loving (b) a funny (c) uncaring man (d) nagging
10. My pastor preaches humility without matching it with action (a) salvation (b) pride (c) kindness (d) modesty
11. He gave a nebulous description of the university campus (a) clear (b) vague (c) short (d) detailed
12. I was intrigued by the manner in which the goal was scored (a) fascinated by (b) uninterested in (c) embarrassed (d) disappointed by

INSTRUCTION: Choose the option which best completes each of the following sentences.

13. The President visited the town with a view to things for himself (a) see (b) seen (c) seeing (d) having seen
14. Jide and Kemi quarreled last week and haven't ____ yet (a) made it out (b) made up (c) made out (d) made it up
15. It's time we ____ away with poor leadership (a) do (b) done (c) did (d) have done
16. It was ____ on the evening news (a) broadcasted (b) being broadcasted (c) been broadcast (d) broadcast
17. The pepper was poorly ____ (a) ground (b) grinded (c) grounded (d) grind

Read the passage below and answer question I 5 that follows

The tunes are familiar. Across our beautiful motherland, rascals are beating the drums of hooliganism and gangsterism. The Armed Forces which is adept at this were again asked to pay an exemplary fine for brutality. This time they shifted their criminality down South where the crime of their victim was for asking an innocuous question. The law lecturer at the gate of a Navy Barrack asked a naval rating if a guest at an expected wedding would be permitted to park their cars along the road. The rating perhaps felt insulted that a bloody civilian had the nerve to ask him a stupid question right at the barrack gate. He dragged the

lecturer out from his car and hit him with the butt of his gun. The man passed out but that was not the end of the ordeal, other naval personnel poured out to hit and whip him with belts. When other citizens expressed fears that the man might be killed, they were also attacked by the 'gallant' men of the disciplined force. It is good that the Honourable Judge of the High Court has awarded N150million damages to the man. The Judge lamented that Nigerians are gradually becoming endangered species in their own country.

18. What was the 'offence' that led to the beating of the man? (a) he packed his car along the road (b) he drove as far as the barrack gate (c) he asked the naval rating a question (d) he mocked the naval rating
19. 'An innocuous question' in the passage means ____ (a) an offensive question (b) an upsetting question (c) an indirect question (d) a question that is not intended to offend.
20. The man 'passed out' means ____ (a) the man died (b) the man became unconscious (c) the man ran away (d) the man fell down
21. From the passage the writer is ____ (a) happy with military-civilian relationship (b) unhappy with military-civilian relationship (c) unhappy that civilian do not respect the military (d) happy that the military displays force when necessary
22. The message of the writer is that ____ (a) the Nigerian Navy is a gallant and disciplined force (b) the civilians often deserve the treatment they get from the military (c) the Nigerian Navy is a force of hooligans and gangsters (d) the fine handed down by the honourable judge was unnecessary.

INSTRUCTION: After each of the sentences below, a list of possible interpretations of all or, part of the sentence is given. Choose the interpretation that you consider most appropriate for each sentence.

23. The problem with Fatai is that he has a finger in every pie. This means that ____ (a) Fatai love eating all kind of pies (b) Fatai is involved in too many activities (c) Fatai prepares good pies (d) Fatai steals things
24. Peter's grandmother has kicked the bucket. This means that ____ (a) Peter's grandmother is dead (b) Peter's grandmother is on admission in a hospital (c) Peter's grandmother is very strong (d) Peter's grandmother has retired from work.
25. I had a night out with Dickson. This means that ____ (a) Dickson and I spent the night reading (b) Dickson and I had an evening of fun and enjoyment (c) Dickson and I were awake all night (d) Dickson and I quarreled all night.
26. I am going for a work out this evening. This means that ____ (a) I am planning to steal this evening (b) I am going back to my office for work this evening (c) I am going for physical exercise this evening (d) I am going to visit a friend this evening.
27. Regarding admission into UCH, I resign myself of fate. This means that ____ (a) I am prepared for whatever happens (b) I am prepared to consult fortune tellers (c) I am prepared to contest the outcome (d) I depend on what my pastor tells me.
28. Michael took the English language examination for granted. This means that ____ (a) he assumed the examination would be easy (b) he expected the examination would be difficult (c) he did not worry about the outcome of the examination (d) he know he was going to fail the examination.
29. I can say that our State Governor is angling for a second from his party. This means that ____ (a) the governor is rejecting a second term (b) the governor is indirectly asking for a second term (c) the governor is being asked to run for a second term by his party against his will (d) the governor is angry over a second term issue.
30. Moses has been booted out of his job by his employers. This means that ____ (a) Moses has been transferred by his employers to another location (b) Moses has been promoted by his employers (c) Moses has been sacked by his employers (d) Moses has been commended by his employers.

SECTION B: GENERAL PAPER

1. Which of the structures listed below is peculiar to the axis vertebra? (a) Centrum (b) Prezygapophysis (c) Lateral spine (d) Odontoid
2. A plant which has a horizontal underground stem is a ____ (a) Rhizome (b) Creeper (c) Tuber (d) Bulb
3. Epigeal germination can be found in ____ (a) groundnut (b) sorghum (c) millet (d) maize
4. The mammalian organ which acts both as a digestive and as an endocrine organ is the ____ (a) liver (b) pancreas (c) spleen (d) adrenal gland
5. Which of the following does a virus have in common animal cell? (a) Glycogen (b) Starch (c) Nucleus (d) DNA
6. Spirogyra, Euglena and Chlamydomonas share many characteristics except ____ (a) growth (b) mobility (c) reproduction (d) irritability
7. Parasitic forms are not found among ____ (a) molluscs (b) nematodes (c) annelids (d) plathyhelminthes
8. A good example of diploblastic organism is ____ (a) hydra (b) insect (c) roundworm (d) amoeba
9. What is the number of an element if its atom contains 10 protons, 10 electrons and 12 neutrons? (a) 32 (b) 22 (c) 20 (d) 10
10. The loss of water crystallization to the atmosphere by some crystalline salts is known as (a) efflorescence (b) effervescence (c) deliquescence (d) phorescence
11. Carbon is often found in the exhaust pipe of cars because of the ____ (a) Dehydrogenation of petrol (b) incomplete combustion (c) Presence of additives (d) Presence of carbon in petrol
12. Plastics are polymers whose production techniques involve all except (a) high pressure (b) low pressure (c) salting (d) high temperature
13. Which of the following gases is produced when ammonium trioxonitrate (V) is heated with sodium hydroxide? (a) Oxygen (b) Ammonia (c) Nitrogen (d) Hydrogen
14. How many grammes of HCl will be required to react with 10g of NaOH (H = 1, Cl = 35.5, Na = 23, O = 16)? (a) 9.125g (b) 4.6g (c) 10.1g (d) 18.4g
15. The bond formed between H_2O and H^+ to form the hydronium ion is ____ (a) co-ordinate covalency (b) electrovalent (c) covalent (d) ionic
16. Common salt is dissolved in water and the mixture is evaporated. The vapour given off is condensed. The condensed vapour is a ____ (a) solute (b) suspension (c) solvent (d) solution
17. When some substances are heated, the change directly in gases without appearing in the liquid state. An example is ____ (a) copper (b) iodine (c) sodium (d) sulphur
18. What is the IUPAC name of the compound KMnO_4 ? (a) Potassium manganate (b) Potassium tetraoxo manganate (VII) (c) Potassium trioxomanganate (IV) (d) Potassium Oxomanganate (IV)
19. Which of the following is the dimension of pressure? (a) MLT^2 (b) ML^{-1}T^2 (c) ML^{-3} (d) $\text{ML}^{-2}\text{T}^{-2}$
20. Which of the following statements is or are correct about a car moving round a circular track at a uniform speed? (i) its velocity is uniform (ii) it undergoes an acceleration (iii) The friction between its tyres and the ground provides necessary centripetal force (a) (i) and (iii) only (b) (i) only (c) (iii) only (d) (ii) only
21. A body initially at rest is accelerated at a rate of 0.2ms^{-2} for 5s under a constant force of 50N, the work done on the body is ____ (a) 50J (b) 2.5J (c) 125J (d) 250J

22. The formation of clouds result directly from ____ (a) vaporization (b) fusion (c) condensation (d) sublimation
23. Replenishing soil nutrients involves one of the following (a) leaching (b) cover cropping (c) bush burning (d) Grazing
24. For a wire of a specific material, which of the following will give the lowest resistance in a circuit? (a) A short, thick wire (b) A short, thin wire (c) Along thin wire (d) Along thick wire
25. A change in temperature of 45°C is equivalent to a change in temperature on the Kelvin scale of ____ (a) 25K (b) 318K (c) 45K (d) 81K
26. A disease that cause abortion in cattle at the first stage of pregnancy is ____ (a) milk fever (b) brucellosis (b) pneumonia (d) foot and mouth disease
27. Which of the following instruments is used to measure relative humidity? (a) Barometer (b) Hydrometer (c) Manometer (d) Hygrometer
28. Which of these statements is correct about cathode rays? They are fast moving ____ (a) atoms (b) protons (c) neutrons (d) electrons
29. On a day when humid, is very high, evaporation from a water pond will be ____ (a) r' D) slow (c) zero (d) fast
30. The cells that surrounded the stomata are called ____ (a) stomata cells (b) epidermal cells (c) guard cells (d) pilliferous layer
31. On the induction of new students in a certain school, 800 students turned up at the open emony, 600 students turned up for the novelty match and that a total of 1234 students altogether in the school. How many students attended ceremonies if a student attended at least one of the functions? (a) 1400 (b) 1660 (c) 140 (d) 166
32. In how many ways can a committee of 5 comprising of 3 males and 2 females be formed from 6 males and 4 females? (a) 20 ways (b) 6 ways (c) 12 ways (d) 120 ways
33. Which of the following is not an exterior angle of a regular polygon? (a) 24° (b) 18° (c) 15° (d) 180°
34. If the square root of $x^2 + 9 = x + 1$, solve for x. (a) 5 (b) 4 (c) 3 (d) 1
35. Simplify $3/5 \div (217 \times 419)$ (a) 415 (b) 7110 (c) 617 (d) 2116
36. Which of these animals is radially symmetrical? (a) Squid (b) Snail (c) Hydra (d) Earthworm
37. A food substance was treated with a few drops of Sudan II solution and red colouration was obtained. The food contained ____ (a) starch (b) vitamins (c) protein (d) fat
38. Members of the phylum protozoa use the contractile vacuole to ____ (a) reproduce (b) remove excess food (c) digest food (d) remove excess water
39. The primary and secondary hosts of Bilharzia are ____ dog (b) man and snail (c) fish and snail (d) snail and dog (a) man and
40. Which of the following statements is true of blood group and blood transfusion? (a) Group B can donate to Group B only (b) Group AB can donate to all (c) Group A can donate to Group A only (d) Group AB is the universal recipient

OAUTHC SCHOOL OF NURSING PAST QUESTIONS AND ANSWERS

ENTRANCE EXAMINATION, 2018

Time allowed: 1Hr 15mins

INSTRUCTIONS

Read the following instructions carefully

1. Use HB pencil to shade your answers. Ensure that any shading in error is thoroughly erased.
2. Candidates should ensure the Question paper type given to them in the appropriate space in the answer sheet.
3. The use of calculators and/or similar devices is not allowed.

SECTION 1: ENGLISH

Read the passage and answer the questions that follow

This book consists of lectures given by me at Cambridge. Though they have been largely written, I have kept a good deal of their original lecture form, as being (I hope) rather less formal and less dogmatic. For to dogmatism, those who write on language seem for some reason, particularly prone; and I should like to make it clear at once that, if at times I have put my views strongly, I do not forget that such matters of taste must remain mere matters of opinion. In addition, I have included a good many specimen passages from various authors. Perhaps I have quoted too much. But a book on style without abundant examples seems to me as ineffectual as a book on art, or biology, without abundant illustrations. Many of these passages are in French. That may be Gallomania on my part: and I must apologize if they trouble some readers. But some ability to read French prose does seem to me most desirable to anyone who would write well in English. I have tried to choose pieces not too difficult in syntax or vocabulary. And in these days less than ever can we afford to be insular.

1. Our understanding of the last sentence is that we (a) can now afford to be insular (b) can be insular in the future (c) cannot afford to be insular (d) must never be insular.
2. To write English well, the author says it is helpful to (a) be able to write French fairly well (b) be able to read French fairly well (c) know French thoroughly (d) be able to read English well.
3. According to the author (in this preface) the book is (a) the original version of his Cambridge lectures (b) a revised version of his Cambridge lectures (c) an imitation of his Cambridge lectures (d) a negation of his Cambridge lectures.
4. The author says that writers on language are (a) inclined to be dogmatic (b) opposed to dogmatism (c) unlikely to be dogmatic (d) resolved to be dogmatic.
5. In the author's opinion, a book on style (a) can do with few examples (b) need not have any examples (c) is a book on art (d) will be ineffectual with sufficient examples.

Each of the following sentences has a list of options A D following it. Choose which option best interprets the sentence.

6. Ade told George that if he were as rich as him, he would have travelled overseas. This means that (a) Ade is not as rich as George therefore he did not travel overseas. (b) Ade is not as rich as George but he travelled overseas (c) Ade is not rich, therefore, he stole to travel (d) George is rich but did not travel overseas.
7. Had her father not died, Edo would have left for London. This implies that Ede (a) went to London after the death of her father (b) did not go to London because her father died (c) would like to go to London when her father dies (d) would like to go to London after father dies.
8. Would you have helped him if he had asked you? This implies that (a) he did not ask so you didn't help him (b) he asked you (c) he asked you and you helped (d) he asked you but you didn't help.
9. If Musa applies for scholarship, he will be able to go to law school. This means that Musa (a) is attending law school (b) has the opportunity of attending law school (c) could not attend law school (d) has applied for a scholarship to attend law school.
10. Had Mr. Opoku not changed his manager, his business would not have been ruined. This tells us that (a) Mr. Opoku changed his manager and his business was not ruined (b) the new manager ruined Mr. Opoku's business (c) the new manager almost ruined Mr. Opoku's business (d) Mr. Opoku changed his manager after his business had been ruined.

Select the best option (from A D) to complete each of the following sentences.

11. At the height of the storm, the savages tried to —the angry gods by offering sacrifices. (a) instigate (b) appall (c) vilify (d) propitiate
12. You should paragraph in order to make your essay more (a) delete... succinct (b) enlarge... redundant (c) remove... discursive (d) reviseabstrus
13. Only the fear of immediate vents the country from launching an attack. (a) reprisal (b) urrender (c) truce (d) surveillance.
14. A diligent scholar, she devoted herself to the completion of the book. (a) assiduously (b) ingenuously (c) theoretically (d) voluminously

15. He was to succeed, painting not for the sake of fame or monetary reward but for the sheer love of art. (a) indifferent to (b) destined for (c) avid (d) enamored of.
16. When the news of his enemy was known, he was hanged in an effigy. (a) contempt for (b) enmity toward (c) collusion with (d) conspiracy against.

In each of the following sentences there is one word underlined and one gap. From the list of words lettered A to D, choose the word or group of words that is most nearly opposite in meaning to the underlined word.

17. The testimony of the witness was so vague that it was difficult to learn details of the case. (a) real (b) true (c) factual (d) specific.
18. The man's speech is rather verbose it needs to be more (a) detailed (b) concise (c) reduced (d) interesting
19. Obiora was a notorious hunter who defied the king's orders not to hunt near the city. (a) illustrious (b) brave (c) anonymous (d) intelligent
20. Although Paul had been accused of the crime, he was later (a) discharged (b) released (c) exonerated (d) dismissed.
21. False modesty is really a form of (a) arrogance (b) humility (c) extravagance (d) incompetence
22. Although I have forgotten the title of the book, I tell the story very well. (a) can recognize (b) can construct (c) can recollect (d) can review.
23. Cameras were once as unwieldy as are now (a) attractive (b) cheap (c) compact (d) efficient.

In Questions 24-27 choose the option nearest in meaning to the underlined.

24. Had she known he was a highway robber, she would not have married him. This means (a) she married him before she knew he was a robber (b) she knew he was a robber when she married him (c) she did not marry him because he was a robber (d) she refused to marry the man when she knew he was a robber.
25. The ingenious scheme of the robber broke down because of the efficiency of the police. Ingenious here means (a) suspicious (b) ambitious (c) deceitful (d) clever.
26. Jide is being forced to go to Lagos tomorrow. This means that Jide (a) will go to Lagos (b) must go to Lagos (c) wishes to go to Lagos (d) is going to Lagos.
27. It is sheer fantasy to believe that there could ever be a miscalculation by any nation that has atomic weapons. Fantasy here means (a) dream (b) hope (c) nonsense (d) joke

In Questions 28-30 select the wrongly selected word.

28. (a) quiet (b) believe (c) proceed (d) precede
29. (a) disappointed (b) embarrassed (c) equipped (d) rhythm
30. (a) occurrence (b) surprise (c) personnel (d) possess

Fill in the blank spaces with the most appropriate of options A-D

31. I am disappointed the way you conducted yourself at the party. (a) by (b) for (c) due to (d) at
32. When we were coming back from the picnic last Friday, there on Eko Bridge. (a) were many traffics (b) was much traffic (c) were plenty traffic (d) were lots of traffic
33. I have refused to give him my pen because I don't want him to use it again. (a) loss (b) loose (c) lose (d) lost.

Choose the option that has the same vowel sound as the one underlined in the given word.

34. Jewel (a) fluent (b) dare (c) wear (d) few.
35. After (a) black (b) about (c) last (d) baker
36. Done (a) gone (b) dove (c) born (d) burn
37. Clerk (a) have (b) back (c) search (d) palm
38. Steak (a) tape (b) stick (c) peak (d) hard

SECTION 2: GENERAL PAPER

1. A-Rattus rattus b-Agama agama c-Bufo regularis d-Tilapia zilli. The order of evolutionary advancement of the above vertebrates is (a) d, c, b, a. (b) d, b, a, c. (c) c, b, a, d. (d) b, c, d, a.
2. Which of the following is likely to have a higher concentration of mitochondria? (a) white blood cell (b) egg cell (c) sperm cell (d) red blood cell.
3. Which of these diseases is not caused by virus? (a) Maize rust (b) Rinder pest (c) Newcastle (d) Cassava mosaic.
4. Metabolic production carried out in the (a) kidney (b) pancreas (c) liver (d) s
5. If a nursing mother 'L producing enough milk, her hormonal system is probably deficient in (a) Prolactin (b) Oestrogen (c) Insulin (d) Thyroxine
6. Nervous control differs from hormonal control in that the former (a) is a slower process (b) involves only chemical reaction (c) produce shorter des (d) has no specific pathway
7. The two key cations involved in the action potential of nervous transmissions are (a) Mg^{2+} (b) Na and Fe^{2+} (c) Na and K (d) Na and Mg^{2+}
8. A boy who is fond of swimming in a pond finds himself passing urine with traces of blood. He is likely to have contacted (a) Onchocerciasis (b) Poliomyelitis (c) Tetanus (d) Schistosomiasis
9. The presence of a large number of mitochondria in a cell indicates that (a) it has little cytoplasmic content (b) the cell is dormant (c) the cell is very active (d) the respiration is poor
10. If the cerebellum of a person is slightly damaged, which of the following will be impaired? (a) vision (b) walking (c) digestion (d) breathing
11. Herbs differ from shrubs because they (a) are only perennials (b) useful to herbalists (c) do not produce fruits (d) do not become woody
12. Which of the following represents the evolutionary sequence in these plants? (i) mango plant (ii) mosses (iii) Spirogyra (iv) ferns (v) whistling pine (a) iii, ii, iv, v and i (b) iii, iv, v, i and ii (c) ii, iv, i, iii and v (d) iv, ii, iii, v and i
13. By which process does oxygen pass from the alveoli of the lungs into the blood? (a) excretion (b) osmosis (c) diffusion (d) transpiration
14. The aspects of growth in living organisms include all the following processes, except (a) reversible increase in size (b) increase in dry weight (c) increase in number of cells (d) irreversible increase in length
15. Which of these excretory products is not to be found in mammals? (a) carbon dioxide (b) mineral salt (c) ammonia (d) urea
16. Which of the following organism is a producer (a) yeast (b) fungus (c) Rhizopus (d) Spirogyra
17. Changes in energy flow, between organisms in a habitat can be represented by (a) pyramid of biomass (b) flow chart (c) food web (d) pyramid of energy
18. Important abiotic factors which affect all plants and animals in the habitat are (a) rainfall and relative humidity (b) temperature and rain fall (c) salinity and relative humidity (d) temperature and turbidity
19. Which of the following factors may not affect living organisms in an aquatic habitat? (a) light (b) turbidity (c) pH (d) humidity
20. The accepted concept for the theory of Natural selection does not include (a) tendency for organism to overproduce (b) struggle for existence (c) survival of the fittest (d) use and disuse of body parts
21. Which of the following pair of structure does not perform the similar function (a) lungs and spiracles (b) root hair and mammalian hairs (c) feathers and scales (d) contractile vacuole and kidney
22. Which of the following is not an evidence of evolution? (a) anatomy (b) genetics (c) behavior (d) fossils
23. Find the variance of the numbers K, $K+1$, $K+2$. (a) $\frac{2}{3}$ (b) 1 (c) $K+1$ (d) $(K+1)^2$
24. Find the positive value of x if the standard deviation of the number $1, x+1, 2x+1$ is V (a) 1 (b) 12 (c) 3 (d) 4
25. If $\frac{x-7}{(x+3)(x-4)} = \frac{M}{x+3} + \frac{N}{x-4}$ what is $3n-4m$ (a) 7 (b) 5 (c) 8 (d) 6
26. Calculate $\sin(A+B)$ if $\sin A = \frac{3}{5}$ and $\cos B = \frac{5}{13}$ where both A and B are acute (a) $\frac{33}{65}$ (b) $\frac{48}{65}$ (c) $\frac{15}{65}$ (d) $\frac{63}{165}$
27. Find $\tan x$ given that $\tan(x+45^\circ) = 2$ ($a > 4$) (a) $\frac{1}{3}$ (b) $\frac{2}{3}$ (c) $\frac{3}{2}$ (d)
28. Express $5x-12$ as a partial fraction (a) $\frac{3}{x-2} - \frac{2}{x-3}$ (b) $\frac{3}{x-2} + \frac{2}{x-3}$ (c) $\frac{3}{x-2} - \frac{2}{x+3}$ (d) $\frac{3}{x-2} + \frac{2}{x+3}$
29. Evaluate $\int 6(2x+3)dx$ (a) 18 (b) 50 (c) 12 (d) 36

30. Find the coordinates of the minimum point for the equation $y = 4t^2 - 40t + 300$ (a)(15, 100) (b)(5 200) (c)(4, 100) (d)(4, 300)
31. 0.0075 mole of Calcium trioxocarbonate (iv) is added to 0.015 mole of a solution of hydrochloric acid. The volume of gas evolved at s.t.p is (molar volume of gas at stp 22.4dm^3) (a) 224cm^3 (b) 168cm^3 (c) 112cm^3 (d) 100cm^3
32. What is the general formula of carbohydrates? (a) CH_2O (b) $\text{C}(\text{H}_2\text{O})$ (c) $\text{C}_6\text{H}_{10}\text{O}_5$ (d) $\text{C}_6\text{H}_{12}\text{O}_6$
33. A neutral water molecule (H_2O) has an electric dipole moment of $6.2 \times 10^{-30}\text{cm}$. how far apart the molecule centers of positive and negative charge? (a) 4.9pm (b) 2.9pm (c) 3.9pm (d) 1.9pm
34. What mass of sodium hydroxide is required to make 500cm^3 of 0.2M solution? ($\text{Na} = 23$, $\text{O} = 16$, $\text{H} = 1$) (a) 20g (b) 10g (c) 4g (d) 2g .
35. $2\text{NH}_4\text{Cl} + \text{Ca}(\text{OH})_2 \rightarrow 2\text{NH}_3 + \text{CaCl}_2 + 2\text{H}_2\text{O}$. From the equation, calculate the mass of calcium hydroxide needed to decompose 50g of ammonium (a) 20.00g (b) 34.57g (c) 75.10g (d) 42.13g .
36. Calculate the current that must be passed into a solution of chromium (iii) salt for one hour in order to deposit 1.2g of Chromium { $\text{Cr} = 51$ } (a) 3.50 amperes (b) 2.30 amperes (c) 1.89 amperes (d) 1.52 amperes
37. Find the angle between P and E when the torque on a dipole is a maximum (a) 180° (b) 90° (c) 45° (d) 30°
38. Choose the correct statement (a) Electric potential is a scalar (b) Electric potential is a vector (c) Electric potential is neither a scalar nor a vector (a) a and b (b) b (c) a (d) a and b
39. An electron in the atmosphere is moved upward through displacement 520cm by an electrostatic force due to an electric field 150N/C . Take the charge on the electron to be $1.6 \times 10^{-19}\text{C}$. Calculate the work done on the electron. (a) $-1.2 \times 10\text{J}$ (b) $1.2 \times 10\text{J}$ (c) $1.6 \times 10^{16}\text{J}$ (d) $-1.6 \times 10^{15}\text{J}$
40. The full meaning of WWW in internet surfing is (a) wide wide web (b) world wide web (c) wide world web (d) world web wide
41. Which country has just produced the fastest moving train in the world? (a) USA (b) Germany (c) China (d) Japan
42. Who was Nigeria's eighth military ruler? (a) Olusegun Obasanjo (b) Muhammadu Buhari (c) Abdulsalam Abubakar (d) Sanni Abacha.

ANSWERS

1. A
2. C

The concentration of mitochondrion is highest in sperm cells, since it provide energy for it to swim

- 3 A
4. C

The linear deiminate protein into urea, also can metabolized urea, but the kidney excretes it out of the body.

5. A
6. C
7. C

Na^+ and K^+ are the only ions that causes action potential in nervous transmission.

8A

OAUTHC SCHOOL OF NURSING PAST QUESTIONS AND ANSWERS

ENTRANCE EXAMINATION, 2019

INSTRUCTION:

Read the following instruction carefully.

1. Use an HB pencil to shade in your answer, ensure that any shading error is thoroughly erased.
 2. Attempt all questions. Each candidate must submit the answer sheet with the question paper
 3. The use of calculator and/or similar electronic devices is NOT allowed.
-
1. Which of the following is not true about semi-conductor? (a) moving holes are equivalent to moving positive charges (b) there is two kinds of charge carried a free electron and a hole (c) the escape of a valence electron from an atom produces electron hole pair charge carries (d) increases in temperature increases its electrical resistance.
 2. The minimum energy necessary to remove an electron from a given atom to infinity is called _____ (a) Excitation energy (b) ground state energy (c) ionization energy (d) binding energy
 3. Find the proglie wavelength of a 0.0kg pellet having a velocity 10m/s (h $6.63 \times 10^{-34} \text{S}$) (a) 6.63^{-34}m (b) $6.63 \times 10^{-32} \text{m}$ (c) $6.63 \times 10^{-33} \text{m}$ (d) $6.63 \times 10^{-35} \text{m}$
 4. A step transformer is designed to operate from a 25V supply. If the transformer is 80% efficient, determine the current in the primary coil when the output terminals are connected to 240V 1 cow lamp (a) 50A (b) 4.0A (c) 2.5A (d) 2A
 5. An object of mass 0.2kg and density 600kgm^{-3} is suspended with a string so that 1/10 of it is immersed in paraffin of density 900kgm^{-3} , find the tension in the string (a) $1.0 \times 10^5 \text{mn}^4$ (b) $2.0 \times 10^5 \text{ms}^4$ (c) $3.0 \times 10^5 \text{ms}^4$ (d) $5 \times 10^5 \text{ms}^4$
 6. A rocket burnt fuel at the rate of 20kgs^4 and eject it with a velocity of $5.0 \times 10^3 \text{ms}^{-1}$ calculate the thrust exerted by the as on the rocket. (a) $1.0 \times 10^5 \text{mns}^4$ (b) $2.0 \times 10^5 \text{ms}^4$ (c) $3.0 \times 10^5 \text{ms}^4$ (d) 10^5ms^4
 7. Which of the following pairs condation quantities only? (a) Velocity and gravitational potential acceleration and field strength (c) momentum and work done ment and mass.
 8. One of the limitation of Thomson's model of the atom is that it does not explain (a) small angle scattering (b) stability of scattering (c) ionization process (d) the variation of the effectively atomic radius
 9. A wire carrying a current J 2.5m in length is placed in a field of flux density 0.12T. What [ne force on the wire if it is placed at 60° to the field? (a) 30.3N (b) 20.5N (0) 1 5.3N (d) 10.5N
 10. In the transformer. the magnetization of the core is repeatedly reversed by the alternating magnetic field resulting in energy dissipation as heat This loss is called (a) Eddy currents loss (b) Hysteresis loss (C) Flux linkage loss (d) joule heating loss
 11. An atom is said to be exited if an election of the atom is (a) in the ground state (b) at infinity (C) promoted to an energy level higher than its original level (d) having energy value of 0.0cV
 12. What happen to a proton number Z and the nucleon number of a nuclide which emits a y-radiation? (a) Z increases by 1 while A does not change (b) increases by 1 and A increases by I (c) Z and A neither increases nor decrease (d) Z increase by 1 while A decreases by 1
 13. A note that is an OCTAVE higher than a given note of frequency 25hz world has a frequency of (a) 2048Hz (b) 1024z (c) 12Hz (d) 512Hz

14. A sound wave of the frequency 130Hz and wavelength 2.0m was proceeded at a distance. d. from a target and echo was heard at the source 0.5second later. Calculate the values of d (a) 650m (b) 1300m (c)260.0m (d) 520.0m
15. In an experiment, lead shot contained in a vertical cardboard cylinder falls through 100cm when the cylinder is inverted. Calculate the rise in temperature caused by 100 such inversion. (Specify heat capacity of lead $13\text{ J kg}^{-1}\text{ K}^{-1}$) (a) 3.3K (b)4.4K (c)5.5K (d)7.7K
16. The QUALITY and PITCH of musical note depend respectively on (a)frequency and harmonies (b) overtones and intensity (c) intensity and frequency (d) overtones and frequency
17. A body is project with a velocity with a velocity $V\text{ms}^{-1}$, inclined at angle B to the vertical. Which of the following give the CORRECT expression for the horizontal component of velocity V_x after time t? (a) $V \cos B$ (b) $V \sin B$ (c) $Vg \cos B$ (d) $V \sin B$
18. A converging lens has radius of curvature 16.0cm, calculate the power of the lens (a) 0.0625 (b)0. 125 (c) 0.250 (d)0.500
19. If the velocity of light in air is $3.0 \times 10^8\text{ms}^{-1}$, find the velocity of light in s medium whose refractive index is 1.5 (a) $5.0 \times 10^8\text{ms}^{-1}$ (b) $5.0 \times 10^7\text{ms}^{-1}$ (c) $2.5 \times 10^8\text{ms}^{-1}$ (d) $2 \times 10^7\text{ms}^{-1}$
20. When an object is at infinity to the pole of a concave mirror the image formed is at (a) principle focus, real and diminished (b) center of curvature, real and inverted (c) center of curvature, virtual and erect (d)principle focus, real and erect
21. A total eclipse of the sun is seen when the observer is in the (a) Umbra region of the sun's shadow (b) penumbra region (C) Umbra region of the moon's show (d) penumbra region of the moons shadow.
22. A long drawn sound arising from overlapping reflections together with the original sound which give rise to the reflections is called (a) Beat(b) Echo (c) diffraction (d) reverberation
23. Which of the following radiation is used for examining the freshness or staleness of eggs in the poultry (a) Ultraviolet rays (b) X-rays (c) Y-rays (d) radio waves
24. Which of the following statements is not correct about magnetic radiation? (a) they are quantities en (b) they are transverse waves (c)they are polarizable (d) they may be deflect in an electronic or a magnetic field
25. A simple cell with amalgamated zinc plate minimizes (a) sparking (b) local (c) Back e.m.f (d) polarization
26. Which of the following mixture? (a) sea water (b) petroleum (c) urine (d)
27. Carbon forms two oxides in both oxides is 1.2 if one mole absorbed separately combines with oxygen, deduces of the oxides (a) $\text{CO}; \text{CO}_2$ (b) $\text{CO}_2; \text{CO}_3$ (c) $\text{CO}_2; \text{C}_2\text{O}$ (d) $\text{CO}_2; \text{CO}_3$
28. If 50cm^3 of CO_2 gas and 50cm^3 of measured, at S.T.P calculate the amount gas in moles (molar gas volume 22.4 dat) (a) 0.023mol (b) 0.022mol (c) 0.002mol (d) 0.002mol
29. How much volume of the ethane would be required to produce 1.12dm^3 of carbor1 (IV)on combustion in sufficient oxygen? $2\text{C}_2\text{H}_6(\text{g}) + 7\text{O}_2(\text{g}) \rightarrow 4\text{CO}_2(\text{g}) + 6\text{H}_2\text{O}$ (a) 56dm^3 (b) 2.24dm^3 of ethane (c) 0.56dm^3 of ethane (d) 56dm^3 of ethane
30. By how much would the volume have increased when 10dm^3 of ozone were converted to oxygen $2\text{O}_3(\text{g}) \rightarrow 3\text{O}_2(\text{g})$ (a) 15dm^3 (b) 19dm^3 (c) 0.5dm^3 (d) 5dm^3
31. The pressure excreted a gas is as a result of (a) the continuous rand on motion of its particles (b) Bombardment of the walls of the container by its molecules (c) the collision between the gas molecules (d)the elastic nature of the gas molecules

32. Which of the following gas will diffuse at the slowest rate? (a) Ammonium (b) Sulphate (IV) oxide (c) Carbon (II) oxide (d) Nitrogen
33. Element P has an electron configuration of 2.8.6. Element R has an electronic configuration of 2.8.8.1 What is likely to form if P and R COMBINE? (a) A covalent compound UPR (b) An ionic compound PR_2 (c) An ionic compound PR (d) An ionic compound P_2R
34. Which is the atomic structure of phosphorus with mass number 31?
- | | Protons | Neutrons | Electrons |
|----|---------|----------|-----------|
| A. | 15 | 16 | 15 |
| B. | 15 | 16 | 16 |
| C. | 16 | 15 | 15 |
| D. | 16 | 15 | 16 |
35. Which metal has the least tendency to form positive ions? (a) Iron (b) Aluminum (c) Sodium (d) Calcium
36. Natural water includes the following except (a) rain water (b) spring (c) pure water (d) lake water
37. Which of the following methods cannot be used to remove permanent hardness in water? (a) addition of washing soda (b) addition of caustic soda (c) permutit method (d) adding alum to water
38. If the solubility of sodium tetraoxosulphate (IV) at 30°C is 18g per 100g, how much is this in gramme per kilograms? (a) 18kg per 100g (b) 180kg per 100g (c) 180 per 100g (d) 180g per 100g
39. The following are examples of colloid except (a) milk (b) starch in water (c) aerosol spray (d) ammonium chloride solution
40. The pH of the solution M, N, O, and P are 4, 6, 8 and 10, respectively, therefore (a) none of the solutions is acidic (b) the pH of 0 is made neutral by adding water (c) P is the most acidic solution (d) M is the most acidic solution
41. Sodium chloride may be obtained from brine by (a) decantation (b) distillation (c) evaporation (d) sublimation
42. Oil spillage in ponds and creeks can be cleaned by (a) Burning of the oil layer (b) spraying with detergent (c) spraying with common salt (d) spraying with hot oil
43. Which of the following is a chemical compound? (a) soap (b) milk (c) urine (d) gold
44. Crystallization is a separation method used (a) where purity of the product is important (b) where beauty of the product is important (c) where one of the product is a solid (d) where the salt cannot be destroyed by heat.
45. Which hydroxide dissolves in water to form an alkaline solution (a) aluminum hydroxide (b) copper hydroxide (c) copper (II) hydroxide (d) Iron (III) hydroxide
46. Which of the following cannot be used as an oxidizing agent? (a) cracking (b) hydrolysis (c) oxidation (d) reduction
47. Which of the following cannot be used as an oxidizing agent? (a) K_2Cr_2 (b) CO_2 (c) H_2H (d) HNO_3
48. What is the number of the pairs of shared electrons in a methane molecule? (a) 1 (b) 2 (c) 4 (d) 8
49. The percentage by volume of nitrogen in air is high because (a) nitrogen is relatively inactive (b) nitrogen supports life (c) nitrogen prevents corrosion of metals (d) nitrogen increases the rate of combustion
50. What quantity of copper will be deposited by the same quantity of electricity that deposited 1.8g of aluminum ($A_1 = 27$, $Cu = 64$) (a) 64g (b) 32g (c) 16g (d) 8g
51. When two genes for the same character (alleles) are contained in the same individuals, the character that shows is known as (a) important character (b) dominant character (c) superior character (d) controlling character

52. In Nigeria a tropical rain forest can be found in (a) Sokoto (b) Kaduna (c) Abuja (d) Abia
53. The sum total of the biotic and abiotic factors that affect living thing is referred to as: (a) environment (b) lithosphere (c) hydrosphere (d) atmosphere
54. Hydrometer is an ecological instrument that, measures (a) rainfall (b) humidity (c) temperature (d) light
55. Which one of the following is air borne? (a) malaria (b) yellow fever (c) cholera (d) tuberculosis
56. *Candida virginalis* is a (a) bacterium (b) fungus (c) virus (d) protozoan
57. All of these are vertebrate except (a) lizard (b) rat (c) star fish (d) tilapia
58. A box was left in the lawn for two days. When the box was removed, the grass under had turned yellow due to lack of (a) carbon dioxide (b) light (c) oxygen (d) water
59. Which of the following deaminates excess amino acids? (a) duodenum (b) ileum (c) liver (d) kidney
60. In which of the following flower part does meiosis occur? (a) anther (b) petal (c) receptacle (d) style
61. When an organism moves its whole body towards a stimulus, the organism is said to exhibit (a) tropic movement (b) tropic movement (c) tactic movement (d) nastic movement
62. A stable self sustaining environment produced by an interaction between the biotic and abiotic components is best described as (a) niche (b) a community (c) an ecosystem (d) a habitat
63. Which of the following is not present in the nucleus of a cell? (a) chromosome (b) nucleus (c) genes (d) mitochondria
64. The release of useful substances from cells of an organism is called? (a) excretion (b) evacuation (c) metabolism (d) secretion
65. The head of the femur articulates with the pelvic at the (a) Glenoid cavity (b) Olocrono process (c) Acetabulum (d) Caracoids process
66. The mammalian cervical vertebrae invariably numb
67. What mechanism is responsible for the rise of water to the tops of tall trees? (a) transpiration er (a) 4 (b) 7 (c) 12 (d) 5 pulls (b) root pressure (c) osmosis (d) capillarity
68. Antibodies in mammalian blood are formed by (a) platelets (b) white blood cells (c) red blood cells (d) liver
69. Which of the following liquids supplies cells in the tissues of a mammal with oxygen and nutrients? (a) blood (b) plasma (c) serum (d) lymph
70. The cockroach and grasshoppers have mouth parts adapted for (a) sucking (b) piercing and sucking (c) biting and chewing (d) biting and lapping
71. The sponging and lapping mouth part occurs in (a) butterfly (b) the cockroach (c) the housefly (d) mosquito
72. The following is not an example of a sex-linked character (a) baldness (b) color blindness (c) hemophilia (d) height
73. Which of these is a vestigial structure? (a) Appendix (b) caccum (c) pancreas (d) sacculus motundus
74. Which of the following air pollution causes acid rain? (a) sulphur dioxide (b) blend oxide (c) carbon dioxide (d) hydrogen sulphide

75. Which of the following does not have a well developed tissue? (a) moss (b) fern (c) whiz pering tree (d) maize
