SCHOOL OF NURSING ENTRANCE EXAM PLANNER

If you enjoy caring for others and interacting with a wide range of people, and if you cope well when confronted with challenges, nursing is a great career choice. Nursing is also a secure profession with excellent starting salaries and very good job prospects. Job opportunities in nursing abound— registered nurses fill more than 2.6 million jobs, making up the largest healthcare occupation in Nigeria. And the need for nurses is likely to continue to soar— many of today's nurses are beginning to retire, leaving thousands of job openings.

The Nigerian population as a whole is also aging, and because older people require more nursing care, the demand for skilled nurses willing to work on the front lines of patient care will also increase. Technological advances in medical care, which allow more medical conditions to be treated, and an emphasis on preventive care also create a greater demand for nurses. As you consider your future in nursing, think about these facts:

- More new jobs are likely to be created for registered nurses than for any other occupation.
- Employers in some areas of the country report a nursing shortage, spurring efforts to attract and keep nurses on staff.
- Hospital outpatient facilities— like same-day surgery centers or rehabilitation centers— offer the most rapid growth in nursing jobs.

To become a registered nurse, you need to pursue one of two educational routes— a bachelor's degree (BNSC), and a diploma programs(RN) which is offered by the University of Nigeria Teaching Hospital (UNTH)Enugu and other Federal and States, as well as Private ,Hospital

accredited by the Nursing and Midwifery Council of Nigeria (NMCN) which require three(3) years of training to become a registered nurse.

Most nursing programs require that you take an entrance test, and that's where this book comes in. The book was designed from real tests, including the admissions test you will face to get into the program of your choice. By tailoring your study plan and using the information in this book, you can achieve your best score and begin the path of your desired career— training to become a nurse.

CAREER OPPORTUNITIES IN NURSING

Registered nurses (RNs) provide direct patient care and serve as health educators in the effort to promote wellness and prevent disease. In giving care, they monitor and record a patient's symptoms and progress, give medications, assist in rehabilitation, and teach patients and families about proper care practices. They assist physicians in everything from routine exams and treatments to surgery. There are limits to what a nurse does— state regulations determine the scope of tasks a nurse can perform. But the factor that most influences a nurse's daily workload is the type of healthcare facility in which he or she works. Nurses work in a range of settings: hospitals, doctor's offices, outpatient surgical centers, nursing homes, schools, or work sites. Home health nurses even work in patients' homes. The following is an overview of what you can expect on the job, depending on your work setting.

- Hospital nurses make up the largest group of nurses. They provide bedside care for hospitalized patients, observe and record symptoms, and administer

treatments and medications. They often work in a specific department of a hospital, such as pediatrics, emergency care, or oncology.

■Office nurses work in doctor's offices, clinics, outpatient surgical centers, and emergency medicine clinics. Their job tasks include assisting with exams, giving medications, dressing wounds, and assisting in minor surgeries. They may also do office work and maintain patient records.

■Nursing facility nurses provide care for residents in nursing homes or long-term rehabilitation centers. They monitor residents' progress, develop treatment plans, and oversee nursing aides and licensed practical nurses.

■Home health nurses work in the patients' own homes. They give medications, check the patient's condition and environment, and instruct patients and caregivers about care and treatment. They may supervise home health aides.

■Public health nurses work on the community level in schools, government agencies, retirement communities, or other settings. They educate the public about health promotion and disease prevention strategies in areas like nutrition, smoking cessation, or childcare.

■Occupational health nurses provide care to employees at work locations, giving emergency treatments, providing health counseling, or identifying potential health problems in the work environment.

Most RNs earn between N100,000 and N500,000 monthly, with the highest paid receiving more than 2.6m annually. Nurses who earned the highest average salaries worked in employment services, followed by hospitals, home healthcare services, physicians' offices, and nursing care facilities.

Registered nurses (RN) care for patients under the supervision of a physician or registered nurse. They provide routine bedside care, such as taking vital signs, preparing injections, applying dressings, or collecting testing samples. They also aid patients with feeding, dressing, and bathing. In nursing facilities, LPNs may evaluate the needs of residents and oversee nursing aides. In private offices or clinics, they may be responsible for some administrative work, such as making appointments or maintaining records. The highest paying LPN positions were found in employment services, followed by home healthcare services, nursing care facilities, hospitals, and physicians' offices.

Working conditions for nurses depend on the type of healthcare facility. For example, work hours vary according to work setting. In nursing homes or long-term rehabilitation centers where residents need around-the-clock care, nurses may work night or weekend shifts. Public health nurses and nurses who work in offices or on industrial work sites follow schedules during regular business hours. Risks for nurses in hospitals and clinics include coming in contact with patients who have infectious diseases. Nurses must follow a standard set of precautions to reduce their risk for disease or other kinds of danger, like radiation or chemical exposure. Nurses are also susceptible to back injury from moving patients.

CHECK YOUR BASIC SKILLS

Nursing requires a range of skills and abilities to perform the job well. Nurses face many challenges on the job—from heavy workloads to long hours on their feet. Review this checklist to see if you fit these job characteristics. Nurses must:

■ show caring and sympathy

- look for ways to help others
- demonstrate emotional stability in stressful situations
- have good observational skills
- have physical stamina
- communicate effectively— talking and listening
- be able to direct and supervise
- be able to follow orders
- use judgment and make decisions
- know how to problem solve.

disciplined institution. There is zero tolerance to corruption and exam malpractices. **You must pass the exam before being enrolled into the school.**

You are expected to possess at least five (5) credits in the core science subjects: English language, Mathematics, Chemistry, Biology and Physics in not more than two sitting.

We wish you success as you study hard to prove yourself worthy as thousands of aspirants compete every year for a very limited space in the school. Remember, “always put your trust in God for he shall direct your path”.

TEAM RECOMMENDATIONS

To the prospectus students,

We salute you and kudos for choosing Nursing as a profession. Nursing is a good and an honourable profession.

The team has covered most areas for preparation with the National standard into various schools of Nursing in Nigeria.

The school of Nursing examination of most schools in Nigeria is broadly divided into two main sections;

- a. The first written common entrance
- b. The selection Interview.

The former which is mainly conducted by the **West African Examination Council (WAEC) OGBA, Lagos** and the later which is solely conducted by the school examination board/body. This comprises of the **written and oral interview**. The team therefore advice the prospectus students to study this text very well as well as most Waec questions.

A very important thing to know while preparing for the exam is that the school which you are aspiring to enter is a well

ENGLISH LANGUAGE

In each of the following words, choose from the alternative the word that suitably completes the missing word.

1. Sheep and bleat, lion and.....
a. Shout b. Brave c. Wicked d. Roar e. Powerful
2. Hand and wrist, foot and....
a. Chin b. Elbow c. Knee d. Ankle e. Shoes
3. Swim and fish, gallop and.....
a. Man b. Lion c. Pig d. Sheep e. Horse
4. Chalk and blackboard, pen and.....
a. Teacher b. Paper c. Pencil d. Slate e. Ink
5. Aeroplane and wings, car and.....
a. Engine b. Driver c. Wheels d. Passengers e. Road

Study the examples below and use it to answer the question 6-9

6. (nag, snag) (nap)
a. b. Spilt c. Snarl d. Scull e. Scroll
7. (Sown, town) (sack tack) (sour)
a. Tour b. Sore c. Tore d. Sound
e. Fore
8. Late, ate sand, and nice
a. Tie b. Ice c. Site d. Size e. Set

9. (Thing, thin) (rand, ran) (Sung,....)

- a. Sang b. Sun c. Sewn d. Sunk e. Sown

Pick out the words not belong to the group.

10. a. Clinic b. Dispensary c. Hospital
d. Maternity e. Supermarket
11. a. Palm oil b. Kerosene c. Lubricating oil
d. Petrol e. Vaseline
12. a. Draw b. Paint c. Read d. Study
e. Teach
13. a. Anambra b. Asaba c. Edo d. Rivers
e. Imo
14. a. Cassava b. Cocoyam c. Potato d. Rice
e. Yam
15. a. Bicycle b. Car c. Lorry d. Motorcycle
e. Tractor
16. a. Biro b. Eraser c. Pen d. Pencil e. Table
17. a. Blue b. Pale c. Red d. White e. Yellow
18. a. Apple b. Banana c. Cherry d. Orange
e. Potato
19. a. Cotton b. Milk c. Oil d. Water e. Wine
20. a. Boy b. Man c. Master d. Princess e. Uncle

Choose the words that cannot be formed by the arrangement of some or all the letters of the word printed in capital letters

21. COMMODITY

- a. Commit b. Common c. Cot
d. Mood e. Tidy

22. DISAPPROVE

- a. Approve b. Proved c. proven
d. Rope e. Sap

23. ARRANGEMENT

- a. Garment b. Game c. Rag
d. Ten e. Trace

24. ACCOMMODATE

- a. Accord b. Come c. Date
d. Mode e. Toad

25. REVEREND

- a. Garment b. End c. Never
d. Render e. Trace

26. QUESTIONS

- a. Notes b. Sites c. Stone
d. Mode e. Tones

27. APPRENTICE

- a. Centre b. Entire c. Paper
d. Price e. Rains

28. CALENDAR

- a. Clean b. Dear c. Lands
d. Lane e. Rear

29. SOMETHING

- a. Gone b. Nest c. Once
d. Sting e. Time

Choose the words that best Completes the second pair.

30. Books and library, animals and

- a. Cage b Forest c. Garden
d. Hole e. Zoo

31. Animals and hair, bird and

- a. Beak b. Claws c. Feather
d. Flight e. Fur

32. King and crown, lawyer and

- a. Beret b Case c. Court
d. Robe e. Wig

33. Teacher and school, warder and.....

- a. Court b. Junction c. Prison
d. Stadium e. Station

34. Sheep and bleat, cat and

- a. Bark b. Hiss c. Mew
d. Neigh e. Roar

35. Ship and harbour, aeroplane and

- a. Hangar b. Hungar c. Hanger
d. Anger

36. Dog and kennel, pig and

- a. Booth b. Stable c. Sty d. Pen

37. Sheep and bleat, pig and .

- a. Neights b. Bellow c. Grunt
d. Trumpet

38. Author and reader, master and .

- a. Chief b. Servant c. Messenger

d. King e. Brother

39. Leader and follower, king and .

a. Subject b. Queen c. Chief d. Lord

5. The alarm of clock A, B, C, D were set to ring. 1 hourly, 2 hourly, 3 hourly and 6 hourly respectively. At 6:30pm on Monday, 22nd July 2005, the alarm of the 4 clocks rang at the same time. Which time of the day will the clocks ring at the same time again?

a) 12:30pm, 22nd July 2005 b) 12:30am, 23rd July 2005

c) 1:30am, 24th July 2005 d) 6:30pm, 23rd July 2005

6. Edet set the alarm of Clock A, B, C/D by 1pm on 1st December to ring 1 hourly, 3 hourly, 4 hourly and 6 hourly respectively. At what time will the 4 alarm clocks ring together.

a) At 3pm on 1st December b) At 6pm on 2nd December

c) At 1am on 2nd December d) At 12am on 2nd December

7. A woman is 3 times as old as her daughter, eight years ago, the product of their age was 112. Find their present age.

a) 36 and 12 b) 38 and 16 c) 38 and 12 d) 36

8. A woman has a 28 day menstrual cycle prior to her pregnancy, calculate her expected date of delivery (EDD), if her last menstrual period (LMP) is 1st April 2010

a) 8 January 2011 b) 7 January 2011 c) 15 January 2011 d) 8 April 2011

ANSWERS TO REASONING

1. If 8 surveyors viewed a land and each subsequent surveyor stood at a km which is twice that of the surveyors standing before him/her where

The total kilometer of the land surveyed is 128km.

2. A 3. B 4. C 5. B 6. C 7. A 8. A

CRITICAL REASONING 2016

1. A woman gave birth on May 19th 2012 her last menstrual period is

a) July 12th b) August 12th

c) August 13th d) September 12th

2. A woman's last menstrual period is May 29th. Calculate her expected date of delivery (EDI)

a) February 29 b) March 7th

c) August 12th d) July 6th

3. If It takes 10 minutes to boil an egg. how many minutes will it take to boil 60 eggs?

a. 120 minutes b. 1 minute

c. 60 minutes d. 10 minutes

4. Three bells toll at interval of minutes, 6 minutes and 8 minutes. if they toll at 12:00 noon, when will they toll together again?

a) 12:06pm b) 12:17pm

c) 12:24 pm d) 12:03pm

5. How many electric poles will be required a wire extending 2ktn, if the distance between each pole is 400111'?

a) 3 poles b) 7 poles

c) 4 poles d) 5 poles

6. How many hours are there between 2:00pm on Friday and 2:00am of the following Saturday?

- a) 14 hours b) 12 hours c) 5hrs 26mins 20secs d) 5hrs 44mins 40secs
 c) 36 hours d) 24 hours

7. A wall clock indicated 12:04pm when the time is 12:00, 1:08pm. when the time is 1:00pm and 2:12pm when it is 2pm. what will the clock indicate when the time is 9:00pm?

- a) 9:40 pm b) 9:44 pm
 c) 9:08 pm d) 9:36 pm

8. Daniel's wrist watch loses 2 minutes every 1 hour. If the wrist watch is adjusted correctly at 2:00pm, what will it read when the correct time is 9:00pm?

- a) 9:44pm b) 10:20pm
 c) 9:40pm d) 12:16pm

9. An aircraft leaves Akanu Ibiamairport for Jos at 14:23 hours and is expected to spend 55minutes for the journey. when will it land in Jos?

- a) 1478 hours b) 1578 hours
 c) 1418 hours d) 1518 hours

10. What is the simple interest on N300 for 5 years at the rate of 6% per annum?

- a. N36000 b. N90.00
 c. N9.00 d. N150.00

11. A tank measuring 10cm by 5cm by 4cm is to be used in filling a tank 20cm by 8cm by 5cm with water. how many times will the tin be used to fill the tank?

- a) 2 times b) 5 times
 c) 4 times d) 8 times

12. It takes John 1 hour 40 minutes to walk to the school from home. if he covers exactly 50m every minutes. how far is the school from home?

- a) 10km b) 2.5km
 c) 1.5km d) 5km

13. From 36 hours 24 minutes 30 seconds, subtract 30 hours 40 minutes 50 seconds?

- a) 5hrs 43mins 40secs b) 6hrs 43mins 40secs

GENERAL KNOWLEDGE

Incomplete metamorphosis is also known as .

- a) Holometabolous b) Hemimetabolous c) Ecdysis d) Molting

2. A room is heated by means of a charcoal fire. A man standing away from the fire is warmed by _____

- a) Conduction b) reflection
 c) Radiation d) Convection

3. Which of the following a reason why a concrete floor feels colder to the bare feet than a mat at on the same floor?

- a) Mat is a better conductor of heat than the feet
 b) Man loses heat to the bare feet at a faster rate than the concrete floor.
 c) Concrete floor is a better conductor of heat.
 d) Mat is a better conductor of heat to the floor

4. A short chair is usually attached to the back of a petrol tanker trailing behind it to ensure that?

- a. Petrol tanker is balanced on the road.
 b. Heat generated by friction in the engine can be conducted to the floor.

- c. Charges generated by friction in the tanker is conducted to the earth
- d. Chain produces sound for the resonance of tanker engine.
5. A ball is released from a height above. Find it's velocity after 10 seconds. Take g as 10ms-2?
- a) 50 b) 100 c) 25 d) 200
6. Which of these surface is a better radiator of heat?
- a) White b) Black c) green d) yellow
7. Which of these is a better absorber of heat?
- a) White b) Black c) green d) yellow
8. Which of these colours is not among the primary colours of light?
- a) Red b) Blue c) green d) yellow
9. The silver surface of a thermo-flask minimize heat loss by _____
- a) Radiation b) Convention c) Conduction d) None of the above
10. The radiator of a motor car cools by a _____
- a) Radiation b) Convection c) Conduction d) Thermocool
11. The heat of the sun-reaches us by _____
- a) Radiation b) Convection c) conduction d) ultracool
12. Expansion is applied in construction of the following except?
- a) Electric pressing iron b) Construction of bridges c) Construction of wrist watch d) Construction of poultry farm
13. According to Hope's experiment of anomalous expansion water has its least volume and maximum density?
- a) Exactly at 4°C b) Between 100 to 0°C c) below 4°C to 0°C d) Above 100°C
14. another name for complete metamorphosis _____
- a) Holometabolous b) Hemiparesis c) Ecdysis d) Metabolism
16. The major reason for entering a hair drier is to
- a) Kill micro-organism
- b) Dry the water in the hair
- c) Relax the hair
- d) Cool the hair
17. What is the meaning of N.P.I?
- a) Elementary psychology institute
- b) National programme on immunization
- c) National primary immunization
- d) New pollution Intervention
18. The primary reason doctors dab methylated spirit or volatile ether on the skin before the body is injected with some drugs is to _____
- a) Kill the micro-organism on the skin
- b) Reduce the pain of needle prick
- c) Wash the skin

CHECK PAST QUESTIONS UPDATES AT WWW.UNTHPORTAL.COM

a. The Heimlich maneuver, two rescue breath and CPR b. Start CPR immediately c. Twelve to fifteen rescue breaths per minute and correct CPR d. you should follow the steps for rescue breathing

5. The best treatment for all heart attack victims is immediately CPR?

TRUE/FALSE?

6. Sharp, stabbing twinges of pain in the chest is a sure sign of a heart attack.

TRUE/FALSE?

7. The accepted treatment for a femur or thigh fracture is:

- a) Place a short padded splint on each side of the leg
- b) This type of fracture is best handled by a traction splint applied by those With special training
- c) Move the victim before properly applying a leg splint
- d) Bind both legs with two long splints using two cravats, one above and one below the break.

8. The victim of a poisonous snake bite is not at risk for getting rabies.

TRUE/FALSE?

9. Some people are very allergic to insect bites and stings. This condition is called?

- a) Septic shock b) Cardiac arrest
- c) Toxic shock syndrome d) Anaphylactic shock

10. A small animal that is almost invisible, burrows into the skin and causes itching?

a) Common wood tick b) Limon- lyme tick

c) Rocky mountain spotted tide d) Chigger

11. The accepted treatment for a nose bleed is?

a) Use direct pressure, elevation and pressure points to control the bleeding

b) Tilt the head back and tightly squeeze the nostrils

c) have the victim lean forward, apply gentle pressure on the nostril. Apply cold towel

d. Lay the victim on his back and treat for shock. Apply heat if available

12. What is the best definition of the "Hurry cases"?

- a) Breathing, bleeding and broken bones
- b) Any condition that threatens a victim's life
- c) Any illness where the victim vomits
- d) Any accident requiring rescue breathing

13. After you have surveyed an accident scene and provided for your own safety you should?

- a) Take charge, remain calm and act with confidence to the level of your training
- b) Provide primary treatment for shock
- c) Call 911 or your local emergency number
- d) Provide immediate treatment for the "Hurry cases"

15. To treat a first degree burn you should?

- a) Apply a good quality burn ointment
- b) Clean the area thoroughly with hot soapy water
- c) Apply a constricting band between the burn and the heat
- d) Apply cool running water until there is little or no remaining pain

16. A victim that has come in contact with poison ivy should?

- a) Wait at least 20 minutes before washing the affected areas with hot water and soap
- b) Rinse the affected area immediately with soap and water
- c) Continue to wear clothes that have come in contact with the plant
- d) Immediately scratch and rub the affected area to provide long term relief from the itching

17. Which health care professional (s) are you likely to find in a hospital emergency department?

- a) Emergency nurse b) Paramedic
- c) Emergency doctor d) All of the above

18. Which of these should your home first aid kit include?

- a) Hydrogen peroxide b) Calamine lotion
- c) Aspirin d) All of the above

19. What should you do if the person next to you suddenly makes a strange sound then falls to ground unconscious, lying stiffly on their back for a few seconds, before beginning to jerk their arms and legs violently

- a) Put something between their teeth stop them from biting their tongue
- b) Remove any objects they may hurt themselves on and roll them on to their side
- c) Restrain their thrashing arms and limbs by holding them down on their back
- d) Commence mouth – to – mouth resuscitation.

20. Which of the following techniques is not suitable for moving an unconscious victim?

- a) Improvised stretcher b) Four – handed seat carry
- c) Two person carry d) Blanket drag

21. Assuming you are properly trained, the best procedure to follow for water rescue is?

- a) Throw, row the go
- b) Try to reach from the shore, then use rope or rescue device, last go with support
- c) swim with support, throw a rope or floatation device, reach with a pole from shore
- d) Reach, paddle, and swim.

22. The primary symptom of the advanced stages of hypothermia remaining immediately medical attention is violent shivering.

TRUE/FALSE?

- c) Use the frail chest protection system
- d) Apply a modified "Johnson fraction splint"

24. Which of the following correctly describes the CPR technique for an adult?

- a) Four cycle of 15 compressions followed by 1 breath each minute
- b) one cycle of one breath and 10 compressions each 2 to 3 inches deep per minute
- c) Twelve cycles of one breath and 15 compressions per minute
- d) Four cycles of two breaths and 15 compressions per minute.

25. What is the best procedure for treating a known poisonous snake bite?

- a) Capture the snake. Place it in an ice chest and take the snake and victim to a hospital
- b) Place a constricting bandage 4 inches above the head of the snake to slow the spread of venom.
- c) Keep the victim calm, keep the bite location lower than the heart, get medical help immediately
- d) Treat the victim for shock and continue the planned activity.

26. White or grayish - yellow patches on someone's ears, noses or cheeks are signs of?

- a) Frost bite
- b) Cold related stress disorder

- c) Anaphylactic shock
- d) Hypothermia

27. What percentage of oxygen is in your exhaled breath?

- a. 50%
- b. 20%
- c. Approximately 16%
- d. 2%

28. What are the CAB's of first aid?

- a) Assessment, breathing and continuation
- b) Airway, bleeding and circulation
- c) Circulation breathing and Airway
- d) Assessment, bleeding and circulation

29. A classmate complained that a flying insect entered her ear, what will you advise her to do?

- a) Poke the ear to remove the insect
- b) To blow air into the ear to enable the insect to fly out
- c) To pierce the ear allowing the insect to fly out
- d) To fill the ear with olive oil or luke warm water in order to kill the insect

30. A child of your neighbor suddenly inserted a small object into his ear while playing. All these are your actions except?

SECTION A

COMPREHENSION

In order to approach the problem of anxiety in play, let us consider the activity of building and destroying a tower. Many a mother thinks that her little son is in a "destructive stage" or even has a "destructive personality" because after building a the boy cannot follow her advice to leave the tower for Daddy to see, but instead, must kick it and make it collapse. The almost manic pleasure with which children watch the collapse in a second of the product of long play labour has puzzled many

especially since the child does not appreciate it at all if his tower falls by accident or by a helpful uncle's hand. He, the builder must destroy it himself. This game I should think arises from the not so distant 'experience of sudden falls at the very time when standing upright on Wobbly legs afforded a new and fascinating perspective on existence. The child who consequently learns to make a tower "stand up" enjoys causing the same tower to waver the collapse: in addition to the active mastery over a previously passive event, it makes one feel stronger to know that there is somebody weaker and Towers, unlike little sisters, can't cry and call, "Mummy".

1. In the passage, 'manic pleasure' means

- a) Wicked pleasure b) Childish pleasure
c) Unlimited pleasure d) Hump pleasure

2. The expression "must kick it and make it collapse" in this context means

- a) Is forced to kick it out and demolish it.
b) Is obliged to kick it and make it collapse.
c) Cannot resist the urge to demolish it.
d) Ought to kick it and make it collapse.

3. According to this passage, it gives a child great

- a) For Daddy to see the tower he has built.
b) To destroy his tower himself.
c) To see his tower accidentally destroyed.

d) To be helped to destroy the tower.

4. How does the writer try to explain this "destructive stage"

- a) It is the last stage in child's development.
b) The child wants to displease his parents.
c) It grows out of the child's recent experience of sudden falls.
d) The child is just going through a destructive stage.

5. What other feeling does the child derive from the fall of his tower apart from pleasure?

- a) Strength b) Pity c) Frail d) Depression

In questions 6 to 10, chose the option nearest in meaning to the word(s) or phrase underlined.

6. What embarrasses me is the **STEALTHY** way in which the new servant goes about his duties in the house.

- a) Indolent b) Furtive c) Boisterous d) Agile

7. Much of his **CHAGRIN** was because he did not win the race.

- a) Stupefaction b) Disappointment
c) Shock d) Surprise

8. When a man is **IMMUNE** to an illness, he is

- a) Opposed of it b) Attached to
c) Attached to it d) Protected against it

- a) Out of hand b) Off- hand
c) Off- heart d) Expertly

**In each of the question 11 to 15, choose the
option opposite in meaning to the
underlined word.**

11. The lotion recommended by the Doctor
SOOTHED Okon's aching tooth.

- a) Calmed b) Extracted
c) Excited d) Worsened

12. My cousin is very lazy. He will take his
studies seriously. His future looks quite
BLEAK.

- a) Cloudy b) Cheerful
c) Cheeeful d) Sturdy

13. This is an **ABRIDGED** edition of Oliver
Twist

- a. Reprinted b. Enlarged
c. Outated d. Extinct

14. Many untrustworthy students give
EVASIVE answers to questions which they
fully understand.

- a) Direct b) Outspoken
c) Simple d) Truthful

15. People are not allowed to keep **WILD** dogs
in homes. Only those that are could certified
..... could

- a) Domesticated b) Inoculated
c) Educated d) Refined

**In each question 16 to 20, fill each gap with
the most appropriate option from the list
provided.**

16. I was able.....Olu my book because
he promised to return it the following day.

- a) Borrow b) Give
c) Lend d) Lease

17. No sooner had the examination
ended.....the students started vacating the
halls.

- a) When b) That
c) Than d) Before

18. The typist complained that he
couldn't.....the Manager's handwriting.

- a) Interpret b) Explain
c) Correct d) Decipher

19... in an attempt to please the
workers promised to provide.....for them as
soon as possible.

- a) Committee / accommodation
b) Committee / accommodation
c) Committe / accommodation
d) Committee / accommodation

20. The outbreak of cholera is fast spreading to
many states and is said to be
assuming.....

**TIPS (KINDLY USE YOUR
DICTIONARY TO STUDY ALL
THE WORDS USED IN THE
TEXT)**

MATHEMATICS

1. Kemi saves 3k out Of her pocket money every week-

How much will she save in 5 weeks?

- a) 5k c) 10k
d) 12k e) 15k

2. Simplify $\frac{1}{3} + \frac{1}{5} + \frac{1}{6}$?

- a) $\frac{7}{30}$ b) $\frac{2}{3}$ c) $\frac{8}{15}$ d) $\frac{7}{10}$

3. 4 boys can scrub the whole floor of a school hall in $2\frac{1}{2}$ hours. How long would it take 5 boys

to scrub the floor at the same rate?

- a) 1 hour b) $1\frac{1}{2}$ hours c) 2 hours
d) $2\frac{1}{2}$ hours e) 3 hours

4. Simplify $3\frac{1}{4} + 1\frac{1}{5} - 2\frac{13}{20}$

- a) $\frac{14}{5}$ b) $\frac{21}{5}$ c) $\frac{23}{20}$ d) $\frac{24}{5}$ e) $\frac{31}{10}$

5. A man drove 180kilometer in 6hours. How far would he travel in 8hours at the same rate?

- a) 240km c) 195km
b) 218km d) 135km
e) 126km

6. If $\frac{1}{2}P + 4 = 20$, what number does represent?

- a. 8 b) 10 c) 12 d) 32 e) 48

7. A local council collects an education rate of $\frac{1}{32}$ from each man and $\frac{1}{4}$ from each woman. If

there are 150 men and 230 women in a village. How much is collected?

- a) $\frac{1}{380}$ b) $\frac{1}{530}$ c) $\frac{1}{860}$ d) $\frac{1}{610}$ e) $\frac{1}{1140}$

8. A train travels for 2hours at 20km an hour. How long will it take another train to travel the same distance at 10km per hour?

- a) $6\frac{2}{3}$ days b) 6hours c) $3\frac{1}{2}$ hours d) 2hours
e) 1hour

9. Simplify $\frac{1}{2} - \frac{5}{8} + \frac{1}{4}$

- a) $\frac{7}{8}$ b) $\frac{3}{8}$ c. $\frac{1}{2}$ d. $\frac{1}{4}$ e. $\frac{1}{8}$

10. A cyclist can travel 30kilometer in 4hours. How many kilometers would be travel in $2\frac{1}{2}$ hours

at the same rate?

- a) $16\frac{1}{4}$ km b) $17\frac{1}{2}$ km c) $18\frac{3}{4}$ km d) $19\frac{1}{4}$ km
e) $20\frac{1}{2}$ km

3. A given volume of methane diffuse in 20 seconds. How long will it take the same volume of Sulphur (iv) oxide to diffuse under the same condition?

- a) 20s b) 50s c) 40s d) 80s

4. Which of the following acts as a reducing and oxidizing agent?

- a) H_2 b) SO_2 c) H_2S d) O_2

5. Which of the following is used in fire extinguisher?

- a) Carbon (ii) oxide b) Carbon (iv) oxide
 c) Sulphur (iv) oxide d) Ammonia

6. How many valence electron are contained in the element represented by $^{31}_{15}P$

- a. 3 b. 5 c. 15 d. 31

7. Water for town supply is chlorinated to make it free from

- a) Bad Odour b) Bacteria
 c) Temporary hardness d) Permanent hardness

8. An example of a polysaccharide is

- a) Dextrose b) Mannose
 c) Glucose d) Starch

9. Alkanals can be differentiated from alkanones by reaction with

- a. Dinitrophenylhydrazine
 b. Hydrogen cyanide
 c. Sodium hydrogen sulphide

d. Tollen's reagent

10. Palm wine turns sour with time because

- a. The sugar content is converted into alcohol
 b. The carbon (iv) oxide Formed during the fermentation process has a sour taste.
 c. It is commonly adulterated by the tappers and sellers
 d. Microbial activity results in the production of organic acid within it.

SECTION A

COMPREHENSION

So far, I have been speaking of science in its university viewed from the perspective of the world at large, in the context of our own country and our sister developing countries.

Many of the factors mentioned earlier are not

very important, for example, pollution, deterioration of the environment and population explosion are not serious problems for us in this country.

Let me now turn to a more specific area namely the role science and technology have played in the uplifting of the material and economic well being of the developed nations will and does influence the criteria that these world nations must choose in order to establish their science, politics and priorities

But the criteria to be used by these nations do not have to be the same as those which have brought the developed countries to their present stage of evolution. For while human beings have the same problem, their solutions to be meaningful will have to be sought within some relevant frame of reference such as the availability of resources and expertise, social values, place and time in the historical scale.

1. "Frame of reference" in this passage means

- a. Point of information b. economic pattern
- c. Range of authority d. Context of situation

2. The writer apparently believes that through science and technology our country can achieve

- a) Peace and order
- b) Progress and material success
- c) Social values and universities.
- d) Wealth and economic progress.

3. According to the passage, the basic considerations for developing science and technology should be three of the following.

- 1. Technical know-how
- 2. Availability of raw material
- 3. Atmospheric pollution
- 4. The people's tradition and belief
- 5. Population 6. Capital
- a) 2, 1 & 6 only b) 3, 2 & 4 only
- c) 5, 3 & 6 only d) 6, 5 & 4 only

4. The main idea of this passage is that •

- a) There is a young gap between the haves and have-nots
- b) There is a need to get rid of his countrymen from the scourges of hunger, disease, ignorance and want.
- c) The concern of science and technology is the same in all countries.
- d) Each nation must plan its development according to its need and resources.

5. The term "our sister developing countries" implies

- a) Britain, Gambia and Canada
- b) Liberia, Sierra Leone and Gabon
- c) Ghana, Germany and Togo
- d) Russia, Switzerland and America

CHECK PAST QUESTIONS UPDATES AT WWW.UNTHPORTAL.COM

6. The task was HERCULEAN

- a) Irregular b) Related to
c) Stimulating d. Demanding

7. The meaning **CANCELED**

- a. Brought up b. Broken off
c. Called off d. Dropped off

8. Thousands of students **are candidates for** the examination but only a few pass

- a. come into b. Call for
c. Go into d. Enter for

9. **For all he cared the game was as good as lost**

- a. He did not care if the game was lost
b) He could not care less if the game was lost.
c) He was almost certain that the game would be lost.
d) He was afraid the game would be lost

10. Many government officials describe the Nigerian press with most **UNCOMPLIMENTARY** words

- a) Depressing b. Dazzling
c. Disparaging d. Insulting

In each of the question 11 to 15, choose the option opposite in meaning to the underlisted word.

11. From the hospital records available, two hundred patients were **discharged** while only fifteen were.....last month.

- a) Acquitted c) Admitted

- b) Convicted d) Submitted

12. **Indolent** students rarely do well in external examination whileones are known to shine.

- a) Able b) Diligent
c. Competent d. Impressive

13. A majority of those who sat for last jamb examination are **SANGUINE** of success

- a) Hopeful b) Pessimistic
c) Unsure d) Disheartened

14. The ministry of health ensures that no **harmful** butdrugs are kept in stock.

- a) Innocuous c) In Offensive
b) Safe d) Improved

15. Our government is making **DETERMINED** effort to eradicate illiteracy.

- a) Compulsory c) innocent
b) Ineffective d)unreliable

In each question 16 to 20, fill each gap with the most appropriate option from the list provided.

16. The austerity of the times has made people to be more..... in their spending.

- a) Watchful c) Miserly
b) Circumspect d) Hesitant

17. The whole class looked forward toKainji Dam at Christmas.

- a) Visiting b) Visit
c) Be visiting d. A visit

MATHEMATICS 2009&2010

1. The grades of 36 students in a test are shown in the pie chart below. How many students had excellent?
 (Excellent=70, Pass=120, V.good=90, Credit=80)

2. A box contains 5blue balls, 3red balls and 2 white balls. 2 balls were selected from the box with replacement. Find the probability of obtaining 2blue or 2 red balls.

- a. $\frac{17}{50}$ b. $\frac{3}{25}$
 c. $\frac{1}{50}$ d. $\frac{3}{250}$

3. What is the probability that an interger x, ($1 \leq x \leq 20$) chosen at random is divisible by both 2 and 3?

- a. 1/20 b.1/3
 c. 3/20 d.7/10

4. Evaluate

$$\frac{\frac{1}{10}x^{\frac{2}{3}} + \frac{1}{4}}{\frac{1}{2} \div \frac{3}{5} - \frac{1}{4}}$$

- a. 2/25 b.19/60
 c.7/12 d.19/35

5. A farmer planted 5,000 grains of maize and harvested 5,000 cobs, each bearing 5,000grains. What is the ratio of the number of grains sowed to the number harvested?

- a. 1:500 b. 1:5000
 c. 1:25,000 d. 1:250,000

6. Three teachers shared a packet of chalk. The first teacher got $\frac{2}{5}$ of the chalk and the 2nd got $\frac{2}{5}$ of the remainder. What fraction did the 3rd teacher get?

- a. 11/25 b. 12/25
 c. 13/25 d.8/15

7. Given that $\sqrt[3]{4^{2x}} = 16$, find the value of x.

- a. 2 b. 3
 c.4 d.6

8. Simplify $\frac{11}{\sqrt{3}+2}$ in the form a+b $\sqrt{3}$

- a. -2- $\sqrt{3}$ b. -2+ $\sqrt{3}$
 c. 2- $\sqrt{3}$ d. 2+ $\sqrt{3}$

9. In a class of 40students, each student offers at least one of physics and chemistry. If the

A GUIDE TO SCHOOL OF NURSING ENTRANCE EXAMINATION BY THE UNTH ICT GROUP
CHECK PAST QUESTIONS UPDATES AT WWW.UNTHPORTAL.COM

number of students that offers physics is three times the number that offers both subjects and the number that offer chemistry is twice the number that offers physics, find the number of students that offers physics only.

- a. 25 b. 15
c. 10 d. 5

10. The length L of a simple pendulum varies directly as the square of its period T. If a pendulum with period 4secs is 64cm long, find the length of a pendulum whose period is 9secs

- a. 36cm b. 96cm
c. 144cm d. 324cm

11. A container has 30gold medals, 22 silver medals and 18 bronze medals. If one medal is selected at random from the container, what is the probability that it is not a gold medal?

- a. $\frac{4}{7}$ b. $\frac{3}{7}$
c. $\frac{11}{35}$ d. $\frac{9}{35}$

12. An unbiased die is rolled 100times and the outcome is tabulated as follows: 2,45,54,2,, what is the probability of obtaining 5?

- a. $\frac{1}{6}$ b. $\frac{1}{5}$
c. $\frac{1}{4}$ d. $\frac{1}{2}$

13. In how many ways can 2 students be selected from a group of 5students in a debating competition

- a. 10ways b. 15ways
c. 20ways d. 25ways

14. The mean age of a group of students is 15years. When the age of a teacher 45years old is added to the ages of the students, the mean of their ages becomes 18years, find the number of students in the group.

- a. 7 b. 9
c. 15 d. 42

15. The weights of 10pupils in class are 15kg, 16kg, 17kg, 18kg,17kg, 17kg, 16kg,18kg, 16kg,17kg. what is the range of the distribution?

- a. 1 b. 2
c. 3 d. 4

16. Some white balls were put in a basket containing 12red balls and 16 black balls. If the probability of picking a white ball from the basket is $\frac{3}{7}$, how many white balls were introduced?

- a. 32 b. 28
c. 21 d. 12

17. Find the value of $110111_2 + 10100_2$

- a. 1001111_2
b. 1101011_2
c. 100101_2
d. 1001011_2

18. A woman bought a grinder for N60,000. She sold it at a loss of 15%. How much did she sell it?

- a. $\square 50,000$ b. $\square 53,000$
c. $\square 52,000$ d. $\square 51,000$

19. Express the product of 0.00043 and 2000 in standard form.

- a. 8.6×10^0 b. 8.6×10^{-3}
c. 8.3×10^{-2} d. 8.6×10^{-1}

20. Solve for x in the equation $8x^{-2} = \frac{2}{25}$

- a. 10 b. 4
c. 6 d. 8

BIOLOGY 2009 & 2010

1. Klinefelters syndrome is characterized by which type of chromosome

- A. XXY B. XY
C. XXX D. X

2. The fruit formed from a single having several free carpels

- A. An aggregate fruit B. A Multiple fruit
C. A simple fruit D. A dry-dehiscent fruit

3. A tissue which connects a muscle to a bone is

- a. Cartilage b. Muscle fibre
c. Ligament d. Tendon

4. Which of the following can cause shrinkage of living cells.

- a. Deionized water b. Hypertonic solution
c. Hypotonic solution d. Isotonic solution

5. An accurate identification of a rapist can be carried out by conducting

- a. Blood group test b. Behavioral trait test
c. DNA analysis d. RNA analysis

6. Which of the following is likely to have a higher concentration of mitochondria

- a. Red blood cells b. Egg cell
c. White blood cells d. Sperm cells.

7. The most important hormone that induces the ripening of fruit is

- a. ethylene b. Indole acetic acid
c. Gibberellin d. Cytokinin.

8. Hassan and Hussain are identical twins but Hassan grows taller and fatter than Hussain. This is probably because

- A. They are raised in different environment
B. Hussain is endowed with genes for shortness and thinness.
C. Hussain inherited genes for tallness and fatness from her father
D. They have dissimilar genotype.

9. A sugar solution was boiled with Fehling's solution A and B and the color remained blue. The sugar tested was

- a. Glucose b. maltose
c. Fructose d. sucrose

10. A person whose blood can be donated to all other people must have the blood group

- a. A b. AB
c. O d. All of the above.

ANSWERS

1. XXY (2X-chromosome and the Y-chromosome will give rise to a male with female body characteristics. It can also lead to mental retardation which is also known as

Klinefelter's syndrome(A)

2. A 3. D 4. B
5. C 6. D 7. A
8. A 9. D 10. C

CHEMISTRY 2009&2010

1. The mass spectrometer can be used to

- a) an atom b) an electron
- c) a proton d). a neutron

2. In a fixed volume of a gas, an increase in temperature results in an increase in pressure due to an increase in the

- a) Number of collisions between
- b) Number of repulsion between gas molecules.
- c) Number of the collisions between the gas molecules and the walls of the container.
- d) Kinetic energy of the gas.

3. The collision theory proposes that

- a) Reactants collide more frequently to bring about reduction in reaction state.
- b) All collisions of reactants are effective.
- c) Reactants must collide with a certain minimum amount of energy to form products.
- d) The fewer the collisions, the faster the reaction rate.

4. Diamond does not -e conduct electricity because it

- a) Has no free valence electrons.
- b) Is a giant molecule.
- c) Contains no bonded electrons.

d) Is a solid at room temperature

5. An aqueous solution of CaCl_2 is

- a) Acidic solution. b) Alkaline solution.
- c) A buffer solution d) a neutral solution.

6. In an electrolytic set-up to protect an iron from corrosion the iron is

- a) Made the cathode b) Made the anode
- c) Used with metal of a lower electropotential
- d) Initially coated with tin

7. A mixture of kerosene and diesel oil can be separated by

- A. crystallization B. distillation
- C. precipitation D. sublimation.

8. When ethanol is heated with excess concentrated Tetraoxosulphate(vi) acid, the organic product formed is

- a) Ethanol b) Ethanoic acid
- c) Ethane. d) Ethene

9. The hydrolysis of groundnut oil by potassium hydroxide is known as

- a) Hydrogenation b) Saponification
- c) Esterification d) Neutralization

10. Which of the following substances causes the depletion of the ozone layer in the atmosphere?

- a) Carbon (iv) oxide b) Chloroflourocarbon
- c) Sulphur (iv) oxide d) Hydrocarbons

ANSWERS

- 1. A 2.C 3.C 4.A 5.D

ENGLISH LANGUAGE

SECTION A (COMPREHENSION)

The young are not paying attention to their elders, and perhaps they never have. But now it happens that with many of them, the reason may be medical. The young aren't listening because they can't hear just as nagging parents have long suspected. Otologists (hearing specialists) now report that youngsters are going deaf as a result of blasting their eardrum with electronically amplified rock 'n' roll.

The hearing specialist used to worry about loud noise as a cause of deafness only in industrial and military situations. They knew that eight hours of daily exposure, year in and year out to the din of the proverbial boiler factory, would eventually result in permanent hearing loss. Riverfers were particularly

susceptible. Then they learned that the same thing happened to aviators. After the advent of jets, the hazard applied to ground crew at airports and flight — deck personnel aboard aircraft carriers hence the introduction of insulated noise, absorbing plastic earmuffs. In discotheques and rock 'n' roll joints, the trouble is not so much in the instrument themselves, or the close quarters. The blame goes to the electronic amplifiers. An old fashioned military band, playing a march in Ramat park, generated as much sound. But the sound was not amplified and was dissipated in the open air. A trombonist sitting in front of a tuber player might be a bit deaf for an hour or so after a concert; then his hearing returned to normal. What did was multiple microphones and speakers and the installation of internal microphones in such instruments as guitars and Bouzoukis.

1. The young are not listening to their elders because
 - a) They never have.
 - b) Their parents nag constantly.
 - c) They are permanently deaf.
 - d) They appear to be going deaf.
2. "Just as nagging parents have long suspected" implies that the parents suspected that suspected' implies that the parents suspected that
 - a) Their children did not listen to them.
 - b) Children could not hear properly after listening to amplified music.

CHECK PAST QUESTIONS UPDATES AT WWW.UNTHPORTAL.COM

- c) Otologists were always right.
- d) Children were disobedient because they did not listen to their parents.

3. What is the result of being subjected to the din of the proverbial boiler factory for a prolong length of time

- a) A loss of hearing which will never improve
- b. Total deafness eight hours a day
- c. Temporary deafness
- d. Hearing loss which can be corrected by medical treatment

4. 'The same thing happened to aviators' this except, according to the passage

- a) The rivers were particularly susceptible.
- b) Industrial and military deafness.
- c) That continued loud noise resulted in deafness.
- d. That working in a boiler factory affected ones hearing.

5. What is the difference between an old fashioned primary band on one hand and disconques and rock 'n' roll joints on the other hand?

- a. One is old fashioned
- b. One produces sound for marching the other disco
- c. one has drum, the other has guitars
- d. one produces amplified sounds, the others does not

In question 6 to 10, choose the option nearest in meaning to the word or phrases underlined

6. The minister's anger was **AGGRAVATED** by the news of the disaster

- a) Abated b) Magnified
- c) Intensified d) Impeded

7. The new vice-chancellor's immediate concern was to **TIDE OVER** the major difficulties at the moment.

- a) Temporarily accommodate
- b) Permanently handle
- c) Decisively solved)
- d)' Pretend to solve.

8. Adeboye's plan for the future are **in the air**.

- a) Suspended c) Empty
- b) Uncertain d) Floating

9. The boy was told that he needed **several more** pints of blood if he was to survive.

- a) Plenty c) many
- b) Much d) Some

10. The man was able to persuade his **WILLFUL AND OBSTINATE** daughter to follow the career he chose for her.

- a) Intelligent and arrogant
- b) Hardworking and intelligent
- c) Unyielding and obdurate
- d) Obscure and odious

MATHEMATICS 2011& 2012

1. The gradient of a curve is $2x+7$ and the curve passes through point (2,0). Find the equation of the curve.

- a. $Y=x^2+7x+9$ b. $Y=x^2+7x-8$
 c. $Y=x^2+7x+18$ d. $Y=x^2+7x+11$

2. A bag containing 5 black, 4white and x red marbles. If the probability of picking a red marble is $\frac{2}{5}$, find the value of x

- a. 8 b. 10
c. 4 d. 6

3. If m:n=13:11. Find $m^2-n^2 : (m+n)^2$

- a. 1:11 b. 1:13
c. 1:10 d. 1:12

4. Find the value of m if $13_m + 24_m = 41_m$

- a. 8 b. 6
c. 5 d. 2

5. Simplify $3\frac{1}{2} - (2\frac{1}{3} \times 1\frac{1}{4}) + \frac{3}{5}$

- a. $2\frac{11}{60}$ b. $2\frac{1}{60}$
c. $1\frac{11}{60}$ d. $1\frac{1}{60}$

6. A father decided to give 20% of his monthly income to his three children as their monthly allowance. The eldest got 45% of the allowance and the youngest got 25%. How much was the father's monthly income if the second child got N3000?

- a. ☐33,000 b. ☐45,000
c. ☐50,000 d. ☐60,000

7. If the interest on N150 for $2\frac{1}{2}$ years is N4.50, find the interest on N250 for 6months at the same rate.

- a. ☐1.50 b. ☐7.50
c. ☐15.50 d. ☐18.50

8. Three boys shared some oranges. The first received $\frac{1}{3}$ of the oranges and the second received $\frac{2}{3}$ of the remainder. If the third boy received the remaining 12 oranges, how many oranges did they share?

- a. 60 b. 54
c. 48 d. 42

9. Evaluate $\frac{81^{\frac{3}{4}} - 27^{\frac{1}{3}}}{3 \times 2^3}$

- a. 3 b. 1
c. 1/3 d. 1/8

10. Simplify $\frac{\sqrt{12}-\sqrt{3}}{\sqrt{12}+\sqrt{3}}$

- a. 0 b. 1/3
c. 3/5 d. 1

11. If m=3, p=-3, q=7 and $r=\frac{5}{2}$ evaluate

$m(p+q+r)$

- a. 19.50 b. 19.15
c. 18.95 d. 18.05

12. if ☐560.70 is shared in the ratio of 7:2:1, what is the smallest share?

- a. ☐392.49 b. ☐56.70
c. ☐113.40 d. ☐56.7

13. The time taken to do a piece of work is inversely proportional to the number of men employed. If it takes 30men to do a piece of work in 6 days, how many men are required to do the work in 4days?

- a. 20 b. 35
c. 45 d. 60

14. Find the range of values of x for which $7x-3 > 25+3x$

- a. $X > 7$ b. $X < 7$
c. $X > -7$ d. $X < -7$

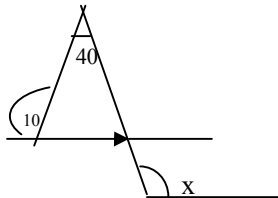

15. If M and N are two matrices defined by

$$M = \begin{pmatrix} 1 & 3 & 2 \\ 4 & 5 & -1 \\ -3 & 2 & 0 \end{pmatrix} \text{ and } N = \begin{pmatrix} 1 & -2 & 3 \\ 4 & -2 & 5 \\ 2 & -3 & -1 \end{pmatrix}$$

Evaluate $2M - 3N$

- a. $\begin{pmatrix} -1 & 12 & 5 \\ 4 & 7 & 13 \\ 0 & -5 & -3 \end{pmatrix}$
b. $\begin{pmatrix} -1 & 0 & -5 \\ -4 & 7 & -17 \\ 0 & -5 & 3 \end{pmatrix}$
c. $\begin{pmatrix} -1 & 12 & -5 \\ 4 & 13 & -17 \\ -12 & 13 & 3 \end{pmatrix}$

d.

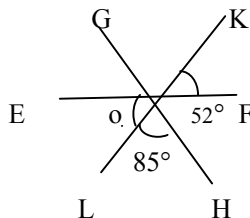

16. In the diagram above, calculate the value of x

- a. 60° b. 100°
 c. 120° d. 140°

17. The sum of the interior angles of a regular polygon is 1800° . Calculate the size of one exterior angle of the polygon.

- a. 30° b. 24°
 c. 18° d. 12°

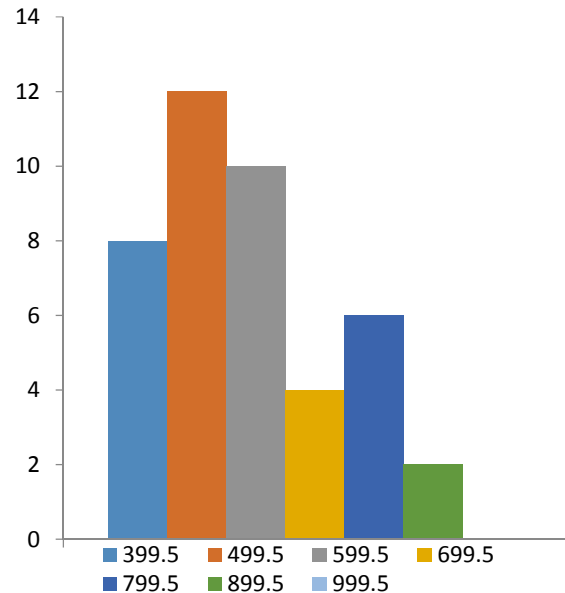

18. Calculate the size of $\angle EOG$.

- a. 26° b. 43°
 c. 52° d. 85°

Scores	1	2	3	4	5	6
No. of Students	1	4	5	6	X	2

19. The table above shows the scores of a group of students in a test. If the average score is 3.5, find the value of x.

- a. 1 b. 2
 c. 3 d. 4

20. The histogram above shows the distribution of the monthly incomes of the workers in a company. How many workers earn more than N700.00

- a. 16 b. 12
 c. 8 d. 6

SECTION A

COMPREHENSION

In time past in Nigeria, being a secretary was perceived with utter disdain by many people. Other professions such as teachers, lawyers, engineers, surveyors, estate officers and architects were revered. Many issues readily come to mind concerning the old perspective of secretaries as professionals

One, they were regarded as people with little or no education. Indeed, many of them were said to be mere typist who learnt how to punch keys on the typewriters. They hardly had any formal education but obtained doubtful certificates. This was made possible because anyone could easily learn to be a typist under the shade tree or in a personal office of a retired secretary or a chief typist As long as a short piece of work could be typed almost accurately and in record time, one then becomes a secretary. This unrealistic practice to call an unqualified person a secretary might have been introduced and sustained by people who did not know who a secretary was. The

educated secretaries obtained a minimum of ordinary National Diploma (OND), or its equivalent from institutions in and outside Nigeria, particularly Great Britain, Canada or United States of America. Two, they were mostly women and very few male secretaries who suffered more humiliation than their female counterparts. They were regarded as men who did not succeed did not succeed in life and did the work that normally women were supposed to do. Three and deriving from the second reason, secretaries were as a matter of fact very close to their bosses. Most people, including husbands of secretaries, regarded such a mode of interacting as tempting, a kind of constant closeness which might endanger a deliberate or unintentional amorous relationship between superior and subordinate officers. Quite often, such a situation could be ruled out when body contact was established inadvertently or deliberately between people of opposite sex especially when either one or both people were attractive and attracted each other. Moreover, we often fall of the devil and the havoc he is capable of causing in lives of people, particularly the unguarded ones. In today's world, these points of view concerning secretaries are fading fast. Now, there is distinction between a typist and a secretary. Modern secretaries are trained in polytechnics and universities. Gone are the days when a secretary were taught only the art of punching the typewriters and various filing systems. They are also encouraged to take training courses other than secretarial duty. Many secretaries have had their training in faculties of business administration and other social

A GUIDE TO SCHOOL OF NURSING ENTRANCE EXAMINATION BY THE UNTH ICT GROUP
CHECK PAST QUESTIONS UPDATES AT WWW.UNTHPORTAL.COM

science departments that enhance their personality, carriage, interpersonal relationship and office management. Obviously, secretaries including the male ones are more important and well respected in the society today than in the past.

1. Modern secretaries are different from the old because they

- a) Are more educated and better exposed to professional training.
- b) Many become teachers in polytechnics and universities.
- c) Are able to become graduates of various universities.
- d) Can use modern gadgets such as computers and other machines.

2. Which of the following statement be deduced from passage concerning the old perspective of secretaries

- a) The training they receive from professionals was sufficient.
- b) They were highly respected by other professionals
- c) One could see that they were well educated
- d) They did not deserve to be addressed as secretaries

3. The expression 'unguarded ones' as used in the passage refers to

- a) Two people who may be attracted to each other.
- b) Husbands of female secretaries.

c) The female secretaries and their bosses.

d) The devil and his cohorts.

4. The expression 'utter disdain' as used in the passage me

- a) Undue criticism b) Complete contempt
- c) Deserved respect d) Professional misconduct

5. Writers seem to suggest that

- a) There was nothing wrong in having males as secretaries.
- b) Secretaries were best trained by retired chief typist.
- c) Only graduates who studied abroad were good secretaries.
- d) The Ordinary National Diploma was sufficient for secretaries.

9. The nurse was in favour of VOLUNTARY
EUTHANASIA.

- a) A sleeping pill b) A major
operation
c) A simple operation d) A painless death

10. The CYNICS feared that the nation's
nascent democracy would fail.

- a) Critics b) illusionists
c) Diligent d) Pessimists

**In each of the questions 11 -15, choose the
option opposite in meaning to the word or
phrase in italics.**

11. The noise of the **UNNERVED** the star
player.

- a) Calmed b) confused
c) Refreshed d) helped

12. The team got an **ECSTATIC** welcome
from the crowd

- a. Joyful b. A thunderous
c. an unexpected d. a cold

13. My father's presentation was rather
CASUAL

- a. Divisive b. Vital c. Informal
d. Formal

14. The journalist said he was working
FREELANCE

- a. Satisfactory b. Without a pay
c. Dependently d. Tirelessly

15. After the war, the victors became
VINDICTIVE.

- a) Treacherous c) Vociferous
b) Arrogant d) Friendly

**In each Questions 16 to 20, fill each gap
with the most appropriate from the list
provided**

16. I do not think any sane person would have
acted in such a.....manner.

- a) Rational b) composed
c) Secret d) Cruel

17. Modern dancing has become rather
scientific and so requires.....

- a) Bizarre costuming b) Some
choreographic skill

C) Immense Instrumentation D) A Rapping
Voice

18. Had he considered his public image
carefully, he..... for his appointment in the
election.

- a) Might have stood aside
b) Would have stepped aside
c) should have stepped down
d) would have stood down

19. Of course, we all saw the
culprit.....and hit the man on the head

- a) Approached b) Approaching

MATHEMATICS 2013

1. In a basket, there are 6 grapes, 11 bananas and 13 oranges. If one fruit is chosen at random, what is the probability that the fruit is either a grape or a banana?

a. 6/30 b. 5/30
c. 17/30 d. 11/30

2. In how many ways can 6 subjects be selected from 10 subjects for an examination?

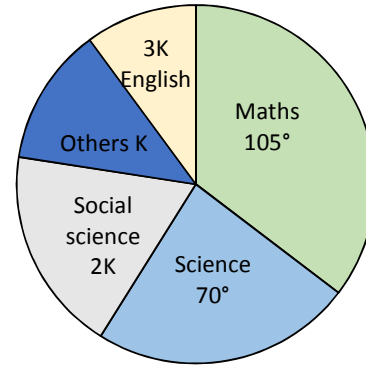

a. 218 b. 216
c. 215 d. 210

3. A senatorial candidate had planned to visit seven cities prior to a primary election.

However, could only visit four of the cities.

How many different itineraries could be considered?

a. 640 b. 840
c. 520 d. 720

4. The pie chart above illustrates the amount of private time a student spends in a week studying various subjects. Find the value of K.

a. 90° b. 60°
c. 30° d. 15°

Age in years	10	11	12
No. of Pupils	6	27	7

5. The table above shows the number of pupils in each age group in a class. What is the probability that a pupil chosen at random is at least 11 years old?

a. 27/40 b. 17/20
c. 3/30 d. 33/40

6. Compute $110011_2 + 11111_2$

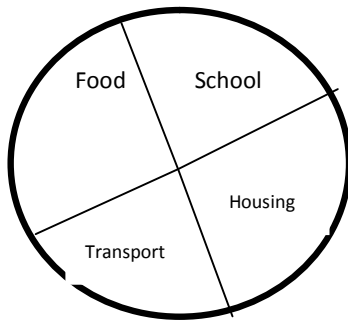

a. 1001010_2 b. 1010010_2
c. 1000110_2 d. 1000100_2

7. Simplify - - - -

a. 34/55 b. 9/11
c. 14/5 d. 3/275

**IF YOU WANT TO BE STRONG,
YOU HAVE TO LEARN TO
FIGHT ALONE**

51] ENUGU. +2348131262487, +2348080912586

8. The pie chart above shows the expenditure of a family whose income is N30000. If the expenditure on food is twice that of housing and that on school fees is twice that on transport, how much does the family spend on food?

- a. ☐ 28,000 b. ☐ 25,500
c. ☐ 15,000 d. ☐ 12,500

9. Simplify $\left(\frac{7}{9} - \frac{2}{3}\right) + \left(\frac{1}{3} + \frac{2}{5} \div \frac{4}{5}\right)$

- a. 11/12 b. 5/6
c. 1/5 d. 2/15

10. Find p and q for which the value of

$$\begin{pmatrix} 2p & 8 \\ 3 & -5q \end{pmatrix} \begin{pmatrix} 1 \\ 2 \end{pmatrix} = \begin{pmatrix} 24 \\ -27 \end{pmatrix}$$

- a. -4, 2 b. 4, 2
c. -4, -2 d. 4, -2

11. Rationalize $\frac{2}{6-5\sqrt{3}}$

- a. $-\frac{12}{39} - \frac{10\sqrt{3}}{39}$ b. $\frac{12}{39} - \frac{10\sqrt{3}}{39}$
c. $-\frac{12}{39} + \frac{10\sqrt{3}}{39}$ d. $\frac{12}{39} + \frac{10\sqrt{3}}{39}$

12. If p varies inversely as the cube of q and q varies directly as the square of r, what is the relationship between p and r?

- a. P varies directly as r^3
b. P varies inversely as r^6
c. P varies inversely as $\sqrt[6]{r}$
d. P varies directly as r^6

13. If $x = \begin{pmatrix} 1 & 0 & 1 \\ 2 & -1 & 0 \\ -1 & 0 & 1 \end{pmatrix}$ and $y =$

$\begin{pmatrix} -1 & 1 & 2 \\ 0 & -1 & -1 \\ 2 & -1 & 1 \end{pmatrix}$. Find $2x-y$

- a. $\begin{pmatrix} 3 & -1 & 0 \\ 4 & -3 & -1 \\ -4 & 1 & 1 \end{pmatrix}$ b. $\begin{pmatrix} 3 & -1 & 0 \\ 4 & -3 & 1 \\ -4 & 1 & 1 \end{pmatrix}$
c. $\begin{pmatrix} 3 & -1 & 0 \\ 4 & -1 & 1 \\ -4 & 1 & 1 \end{pmatrix}$ d. $\begin{pmatrix} 3 & -1 & 0 \\ 4 & 1 & 1 \\ -4 & -1 & 1 \end{pmatrix}$

14. A binary operation on the set of rational numbers is defined as $x*y = \frac{x^2-y^2}{2xy}$ find $-5*3$

- a. $-\frac{8}{15}$ b. $\frac{8}{15}$
c. $\frac{17}{15}$ d. $-\frac{17}{15}$

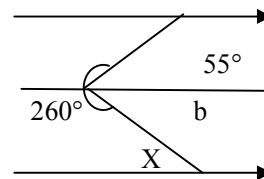

15. Solve the inequality for which $\frac{3+4}{3} - \frac{x-3}{2} < 4$

- a. $X < 7$ b. $X > -7$
c. $X < -7$ d. $X > 7$

16. The sum of the first n positive integers is

- a. $\frac{1}{2}n(n-1)$ b. $n(n+1)$
c. $n(n-1)$ d. $\frac{1}{2}n(n+1)$

17.

In the diagram above, find the value of x.

- a. 55° b. 45°
c. 35° d. 25°

18. If $\tan \Theta = \frac{5}{4}$, find $\sin^2 \Theta - \cos^2 \Theta$

- a. 5/4 b. 41/9
c. 9/41 d. 1

19. If the interest on ☐ 150.00 for $2\frac{1}{2}$ years is ☐ 4.50, find the interest on ☐ 250.00 for 6months at the same rate?

SCHOOL OF NURSING BIOLOGY 2013

1. Identical twins inherit their gene from

A. the same egg and sperm

B. different eggs and sperm

C. two eggs and one sperm

D. one egg and two sperm

2. If a nursing mother is not producing enough milk, her hormonal system is probably deficient in

A. insulin B. Prolactin

C. Thyroxin D. testosterone

3. The only vein that carries pure oxygenated blood is the

a. Sciatic vein b. pulmonary vein

c. Hepatic vein d. Renal vein

4. Which of the following produces both hormone and enzyme

a. Pancreas b. Ileum

c. Gall bladder d. Kidney

5. Night blindness results from a deficiency of

a. vitamin K b. Vitamin E

c. vitamin C d. vitamin A

6. The product of excretion common to the mammalian kidney, lung and skin is

a. Mineral salt b. Carbon(iv)oxide

c. Water d. Urea

7. The causative agent of typhoid fever is

a. Salmonella b. Entamoeba

c. Escherichia coli d. Shigella

8. The pancreas secretes enzymes for the digestion of

a. fats, vitamins and carbohydrates

b. fats, cellulose and mineral

c. fats, vitamin and cellulose

d. fats, protein and carbohydrates

9. A boy who is fond of swimming in a pond finds himself passing urine with traces of blood is likely to have contracted

a. Onchocerciasis b. Salmonellosis

c. Schistosomiasis d. poliomyelitis

10. The most common mode of transmitting the acquired Immune deficiency syndrome is

a. From mother to child

b. Through blood transfusion

c. Through sexual Intercourse

d. Through the sharing of needles

ANSWERS

1. A 2. B 3. B 4. A 5. D

CHEMISTRY 2013

1. A basic postulate of the kinetic theory of gases is that the molecules of a gas move in straight lines between collisions. This implies that

- a. Collisions are perfectly elastic
- b. Forces of repulsion exist
- c. Forces of repulsion and attraction are in equilibrium
- d. Collisions are inelastic

2. Which of the following terms indicates the number of bonds that can be formed by an atom?

- a. Oxidation number b. Valence
- c. Atomic number d. Electronegativity

3. Calcium hydroxide is added in treatment of town water supply to

- a. Kill bacteria
- b. facilitate coagulation of organic particles
- c. Facilitate sedimentation
- d. Improve the taste of the water

4. A blue solid, T, which weighed 5.0g was placed on a table. After 8hours, the resulting pink solid was found to weigh 5.5kg. It can be inferred that substance T

a. Is deliquescent

b. Is hygroscopic

c. Has some molecules of water of crystallization

d. Is efflorescent

5. Sodium hydroxide should be stored in properly closed containers because it

- a. Readily absorbs water vapour from the air
- b. Is easily oxidized by atmospheric oxygen
- c. Turns Golden yellow when exposed to light
- d. Melts at a low temperature.

6. The label on a reagent bottle containing a clear organic liquid dropped off. The liquid is neutral to litmus and gave a colourless gas with metallic sodium. The liquid must be an

- a. Alkanoate b. Alkene
- c. Alkanol d. Alkane

7. An organic compound containing 40.1% carbon and 66.7% hydrogen has an empirical formula of

- a. $C_2H_4O_2$ B. $C_2H_3O_2$
- c. CH_2O d. CH_3O

8. A major effect of oil pollution in coastal waters is the

- a. Destruction of marine life
- b. Desalination of the water
- c. Increase in the acidity of the water
- d. Detoxification of the water

PHYSICS 2013

1. A particle of weight 120N is placed on a plane inclined at an angle 30° to the horizontal. If the plane has an efficiency of 60%, What is the force required to push the weight uniformly up the plane?

- a) 50N b) 100N
c) 175N d) 210N

2. A boy drags a bag of rice along a smooth horizontal floor with a force of 2N applied at an angle of 60° to the floor. The work done after a distance of 3m is

- a) 3J b. 4J c. 5J d. 6J

3. I. Mass II. Density III. Temperature IV. Nature of substance. Which of the above affect diffusion?

- a) I and II only b) I, II and IV only
c) I, II, III and IV d) I and III

4. In a large telecommunication auditorium, perforated absorbent materials are used to line the ceiling so as to

- a) Increase the reverberation of sound in the hall
b) Increase the amount of echo in the hall
c) Reduce the height of the ceiling from the floor
d) Reduce the reverberation of sound in the hall

5. Lenz's law is a law of the conservation of

- a) Electric charge b) Electric current
c) Energy d) Momentum

6. The theory of electronic conduction in solids, which satisfactorily explains the properties of conductors, insulators, and semiconductors is

- a) Particle theory b) Band theory
c) Group theory d) String theory

7. A mirror of weight 75N is hung by a cord from a hook on the wall. If the cord makes an angle of 30° with the horizontal, the tension in the cord is

- a) 150N b) 100N
c) 1500N d) 250N

8. During electrolysis, 2.0g of a metal is deposited using a current of 0.05A in 3 hours. The mass of the same metal which can be deposited using a current of 1.5A in 1 hour is

- a) 3.0g b) 2.0g

CURRENT AFFAIRS 2013

1. "YES WE CAN" who made this statement in his inaugural speech
- a) President Olusegun Obasanjo
- b) President Patrick Lumumba
- c) President Barrack Obama
- d) President Goodluck Jonathan

2. Who is the minister of trade and investment?
- a. Dr. Chris Ngige
- b. Dr. Olusegun Aganga
- c. Mr. Solomon Upeh
- d. Dr. Patrick Ikeji
3. Lemon green is used by which telecom company in Nigeria?
- a) Airtel b) Glo
- c) Etisalat d) MTN
4. Who is the current FIFA best player of the year?
- a) Lionel Messi b) JJ. Okocha
- c) Xavi Alonso d) Bob Marley
5. Which of the following is not the duty of the police in Nigeria?
- a) Arresting law breakers
- b) Protecting lives and properties
- c) Killing offenders
- d) Enforcing law and order
6. Which of these is Zimbabwe?
- a) Swaziland b) Rhodesia
- c) Nyasa land d) Basuto
7. Which state of Nigeria lost its governor in a December 2012 plane
- a) Adamawa b) Bauchi
- c) Kaduna d) Kano

8. The public agency now mandated to register birth and deaths in Nigeria is the

- a) National civic registration commission
- b) Civic service commission
- c) Ministry of health
- d) National population commission

9. The motto of the national coat of arm is

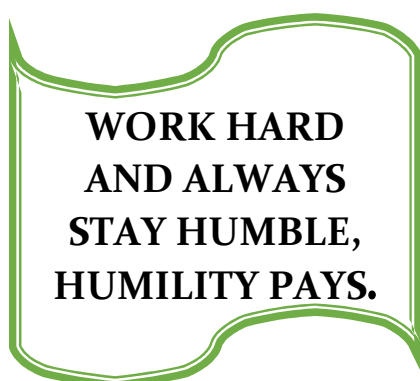

- a) Unity and faith, peace and progress
- b) Unity and Love, peace and wealth
- c) Unity and faith, peace and strength
- d) Unity and progress, Love and freedom

10. The body responsible for solving drug trafficking and other related crimes is

- a. NAFDAC b. DFFRI
- c. WAI BRIDGE d. NDLEA

SECTION A

COMPREHENSION

Read the passage below carefully and wer the question below

While trying so desperately to cope with the scourge of dreaded HIV/AIDS virus, the human race was once again beset with problem of grappling with another fast-spreading and lethal pandemic called EBOLA VIRUS DISEASE also called EBOLA HAEMORRHAGIC FEVER. The Genus Ebola virus strain was spread from wild animals (infected chimpanzees, gorillas, fruit bats, monkeys etc) and spread in the human population through human to human population transmission and could be more deadly than HIV/AIDS. The pandemic has ravaged many countries like Liberia, sierra - Leone and Guinea, resulting in many human casualties. As the pandemic made its steady

spread from Nzara, Sudan and in Yambuku, democratic republic of Congo, there was the fear that, if it ever got to West Africa, the consequences would be devastating in view of the continent's lack of infrastructure and money to keep it in control. This fear was consequent upon African Countries unenviable response to emergencies in the past like droughts in some Sahelian countries or flooding along the coast. It was against this frightening background that many Nigeria were thrown into panic. Following the announcement on 21st July, 2014 that Ebola virus has indeed Nigeria. The announcement itself was a sequel to the death of a foreigner in a private hospital in Lagos State as confirmed by the Nigerian minister of Health. Several Follow up actions had been taken to try and halt the spread of the virus in the country. Such as the immediate quarantine of the contacts, cremation of the index case, barrier nursing of infected clients and surveillance in airports and borders. Commendable as these measures are, many Nigeria still dreads contact with people. As a result any patient especially ones bleeding are feared to be suspected cases of Ebola Virus Disease. To the return to status quo ante and restore the confidence of the Nigeria, additional measures were suggested strict isolation and barrier nursing procedures on the infected clients, closure of the borders and strict surveillance at airport and on quarantined patients, public awareness campaigns on Ebola virus.

1. A suitable title for this passage is

- a. Human casualties of Ebola Virus Disease pandemic in Nigeria
 - b. HIV/AIDS and Ebola Virus Disease pandemic in Nigeria
 - c. The ravaging effects of epidemics in Nigeria.
 - d) Controlling Ebola virus disease pandemic in Nigeria.
2. From the passage, it can be inferred that;
- a. Infected patients were not well isolated.
 - b. Ebola Virus Disease had already resulted in a high human death till West Africa.
 - c. Nigeri no longer visit crowded places as a result of Ebola Virus Disease.
 - d. Ebola Virus Disease was first discovered by the federal ministry of health.
3. The expression 'Return to status quo ante' refers to the:
- a) State of the affairs followings the Ebola Virus Pandemic in Nigeria.
 - b) Condition of things prior to the incidence of Ebola Virus Disease
 - c) Ebola virus Disease pandemic that had ravaged many countries in Liberia, Sierra Leone and Guinea.
 - d) Quarantining of contacts as a result of Ebola virus Disease and its effects on the Nigeria Population.
4. From the third paragraph, the steps taken to check the spread of Ebola Virus Disease in Nigeria are;

CHECK PAST QUESTIONS UPDATES AT WWW.UNTHPORTAL.COM

- a) Restricting movement, cremation of the index case.
- b) Admission and treatment of infected people.
- c) Monitoring all hospital quarantining all contacts.
- d) Strict isolation and nursing all contacts and

5. Which of the following statements is true according to the passage

- a) The many human casualties led to the discovering of Ebola Virus Disease
- b. It is not quickly controlled, Ebola Virus Disease might prove more deadly than HIV/AIDS
- c. Nigeria's handling of the Ebola Virus Disease pandemic justified African countries inability to cope with the disaster
- d. Hospitals in Nigeria have been quarantined.

In Question 6 — 10, choose the option nearest in meaning to the word or phrase in italics.

6. We were at a loss to understanding why Oli should **RETRACT** his statement before the judge.

- a) Assert c) withdraw
- b) Repeat d) retreat

7. The workers hope to appear before the **ARBITRATION** panel to resolve the lingering dispute

- a) Trial b) legislative
- c) Investigate d) Reconciliation

8. He was not able to **WITHSTAND** the attack from the immediate family.

- a. Survive b. Overcomed
- c. Match d. Resist

9. Our front door is always kept **AJAR**.

- a) Locked c) half-closed
- b) Sealed d) permanently open

10. The students **REMONSTRANCE** were rebuffed by the authority.

- a) Protests b) Suggestions
- c) complaints d) Regrets.

In each questions 11-15, choose the option opposite in meaning to the word or phrase in italics.

11. The vice chancellor **RELINQUISHED** power at the end of his term.

- a) Clung on to c) Gave up
- b) Abandoned d) wielded

12. Mr Adewale is quite A **CONCEITED** young man.

- a) Prescient b) an unassuming
- c) An experienced d) a resourceful

13. For anything to do with academic works, he has a great **A VERSION**

- a) Conversion c) predilection
- b) attention d) contempt

14. The man paid a large sum to **REDEEM** his mortgaged property

- a) Rom c) acquire

ANSWERS

- a) An undisguised b) an admissible 1. D 2. B 3. B 4. D 5. B
c) a supportive d) A uncorroborated 6. C 7. A 8. D 9. C 10. A
In each of the questions 16 — 20, choose the
option that best complete the gap(s)
11. A 12. B 13. C 14. B 15. D
16. B 17. A 18. C 19. D 20. B

16. The brave hunter killed thein the forest.

- a) Big spitting black cobra
b) Big black spitting cobra
c) Black big spitting cobra
d) Big spitting cobra black

17. Olu brought his clothes and those of his.....

- a) Elder brothers b) Senior brother's
c. Senior brother d) elder brother

18. His father hardly misses the news because he goes about with hisradio

- a. Potable b. Pointable
c) portable d) Pocketable

19. The old man was rushed to hospital when the blood pressure dropped to a..... level.

- a) Dangerous low b) dangerous lowly
c) dangerous low d) Dangerously low

20. Until he lost the election, Agboto be the students' union president.

MATHEMATICS 2014

1. Add 1101_2 , 10111_2 and 111_2 ?
a. 111011_2 b. 110110_2
c. 101011_2 d. 101010_2
2. Musa borrows N10.00 at 2% per month simple interest and repays N8.00 after 4months. How much does he still owe?

- a. $\square 10.80$ b. $\square 10.67$
c. $\square 2.80$ d. $\square 2.67$

3. Evaluate $\frac{\frac{3}{8} \div \frac{1}{2} - \frac{1}{3}}{\frac{1}{8} \times \frac{2}{3} + \frac{1}{3}}$

- a. $\frac{1}{4}$ b. $\frac{1}{3}$
c. $\frac{1}{2}$ d. 1

4. Express 123456 to 3 significant figures?

- a. 123000 b. 124000
c. 125000 d. 126000

5. Calculate the simple interest on N7500 for 8years at 5% per annum?

- a. $\square 3000$ b. $\square 600$
c. $\square 300$ d. $\square 150$

6. The cost of kerosene per litre increases from N60 to N85.What is the percentage increase?

- a. 42% b. 41%
c. 40% d. 25%

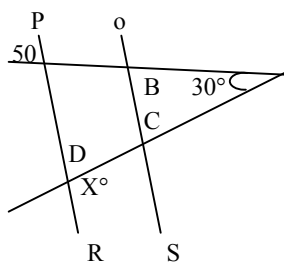

7. Factorize completely $(4x+3Y)^2$, $(3x-2Y)^2$

- a. $(X+5Y)(7X+Y)$ b. $(X+5Y)(7X-Y)$
 c. $(X-5Y)(7X+Y)$ d. $(X-5Y)(7X-Y)$

8. If $x-3$ is directly proportional to the square of y and $x=5$ when $y=2$, find x when $y=6$?

- a. 30 b. 21
 c. 16 d. 12

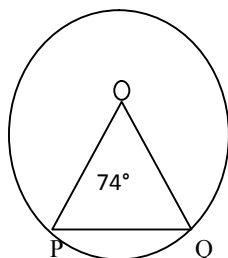

9.

In the diagram above PQ/RS. The size of the angle marked X is?

- a. 100° b. 80°
 c. 50° d. 30°

10.

In the diagram above, $\angle OPQ$ is

- a. 90° b. 53°
 c. 36° d. 26°

11. In a class of 40 students, each student offers at least one of physics and chemistry. If the number of students that offer physics is three times the number that offers both chemistry is twice the number that offers physics, find the number of students that offer physics only?

- a. 25 b. 15
 c. 10 d. 5

12. In how many ways can the letters of the word ELATION be arranged

- a. 6! B. 7!
 c. 5! D. 8!

13. Y is inversely proportional to X and $Y=4$ when $X= \frac{1}{2}$. Find X when $Y=10$.

- a. $\frac{1}{10}$ b. $\frac{1}{5}$
 c. 2 d. 10

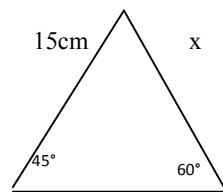

14. The sum of the interior angles of a pentagon is $6x+6y$. find y in terms of x ?

- a. $Y=60-x$ b. $Y=90-x$
 c. $Y=120-x$ d. $Y+150-x$

15. PQRSTV is a regular polygon of side 7cm inscribed in a circle. Find the circumference of the circle PQRSTV?

- a. 22cm b. 42cm
 c. 44cm d. 56cm

16.

Find the value of x in the figure above

- a. $20\sqrt{6}$ b. $15\sqrt{6}$
 c. $5\sqrt{6}$ d. $3\sqrt{6}$

17.

GSM operators	GTN	PLO	QTEL	CMOb
NO. of recharge cards	5	6	3	6

The table above shows the distribution of recharge cards of four major GSM operators. What is the probability that recharge card selected at random will be GTN or Qtel?

- a. $\frac{1}{4}$ b. $\frac{3}{20}$
 c. $\frac{3}{4}$ d. $\frac{2}{5}$

1. The hepatic portal vein is characterized by

- a. Beginning and ending with capillaries
 b. Connecting the liver and kidney
 c. Having no capillaries.
 d. Ending with large capillaries that enzymes

2.The digestive enzymes that coagulates protein in milk is

- A. Pepsin B. Rennin
 C. Ptyalin D. Trypsin

3. After double fertilization in a flowering plant how many nuclei are

- a. 2 b. 1 c. 3 d. 4

4. Which of the following is hormones work together with parathyroid hormones (PTH) to regulate the blood calcium level

- a. Calcitonin b. Oxytocin
 c. Parathormone d. Adrenaline

5. The part of mammalian ear responsible for the maintenance of balance is

- a. Perilymph b. Ossicles
 c. Cochlea d. Pinna

6. The causative agent of bird flu is

- a. Virus b. Bacteria
 c. Fungus d. Protozoa

7. The cations involved in the action potential of nervous trmission are

- a. Na⁺ and Fe²⁺ b. Mg²⁺ and K⁺
 c. Na⁺ and K⁺ d. Fe²⁺ and Mg²⁺

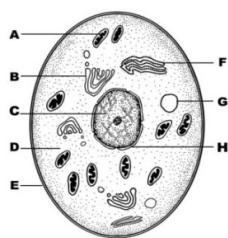

8. Which of the following is lacking in the diet of a person with kwashiokor

- a. vitamin b. Protein
 c. carbohydrate d. Mineral

9. Which of the following spread malaria in Nigeria

- a. anopheles mosquito
 b. culex mosquito
 c. Tsetse fly

d. Aedes mosquito

10. The endoplasmic reticulum is represented by the part labeled

- a. C b. A c. F d. E

1. Which of the following are produced when ammonium trioxonitrate(v) crystals are cautiously heated in a hard glass round-bottomed flask?

- a) N_2O and steam b) NO_2 and ammonia
 c) N_2O_4 and NO_2 d) NO and NO_2

2 A gas sample with an initial volume of $3.25dm^3$ is heated and allowed to expand to $9.75dm^3$ at constant pressure. What is the ratio of the final absolute temperature to the initial absolute temperature?

- a. 3:1 b. 5:2 c. 5:4
 d. 2:1

3. A liquid begins to boil when

- a. Its vapour pressure is equal to the vapour pressure of its solid at the given temperature.

b. Molecules start escaping from its surface

c. Its vapour pressure equals the atmospheric pressure

d. Its volume is highly increased

4. Sulphur exists in six forms in the solid state. This property is known as

- a) Isomerism b) Allotropy
 c) Isotopy d) Isomorphism

5. Which of the following gases is the most dangerous pollutant?

- a) Hydrogen sulphide b) Carbon (iv) oxide
 c) Sulphur (iv) oxide d) Carbon (ii) oxide

6. The reaction of an alkanol with an alkanoic acid in the presence of concentrated H_2SO_4 will produce an

- a) Alkanal b) Alkanoate
 c) Alkanone d) Alkyne

7. Potassium tetraoxomanganate(vii) is often added to impure water to

- a) Reduce Organic Impurities
 b) Reduce Inorganic Impurities
 c) Destroy Bacteria and Algae
 d) Remove permanent hardness

8. Soap lather is an example of a colloid in which a

- a) Liquid Is Dispersed in Gas
 b) Solid Is Dispersed in Liquid
 c) Gas Is Dispersed in Liquid

1. If the distance from a point source of sound is doubled. by what factor does the intensity decrease?
- a) 4.00 b) 2.00
- c) 0.50 d) 025
2. A person can focus objects when they lie beyond 75cm from his eyes. The focal length of the lens required to reduce his least distance of distant vision to 25cm is
- a) 37.50cm b) 75.00cm
- c) 18.75cm d) 25.00cm

3. In a large telecommunications auditorium, perforated absorbent materials are used to line the ceilings so as to
- a) Increase the reverberation of sound in the hall.
- b) Increase the amount of echo in the hall.
- c) Reduce the height of the ceiling from the floor
- d) Reduce the reverberation of sound in the halls.
4. A motorcycle of mass 100kg moves round in a circle of radius 10m with a velocity of 5ms⁻¹. Find the coefficient of friction between the road and the tyres

- a) 25.00 b) 2.50
- c) 0.50 d) 025

5. A spring of force constant 500NM⁻¹ compressed such that its length shortens by 5cm. The energy stored in the spring is

- a) 0.625J b) 6.250J
- c) 62.500J d) 625.000J

6. It is observed that water will wet a clean glass because the

- a) Cohesion of water to glass is stronger than the cohesion of molecules.
- b) Adhesion of water molecules is weaker than the cohesion of water to glass
- c) Cohesion of water to glass is weaker than the cohesion of water molecules.
- d) Adhesion of water molecules is stronger than the cohesion of water molecules.

SECTION A

COMPREHENSION

Whenever I have to ask myself this question why I have not left this country for good, many were rush into my mind, each striving to be recognized as being the most cogent, I am reminded of the popular slogan that "This country belongs to us all", for which every Nigerian must join hands in trying to salvage it. I try to dismiss the argument by reasoning that it is fool hardly attempting to lend a helping hand where one's service are apparently not required. Then I am reminded that I left the country in a hurry just because required our political instability and economic hardship, my commitments to my family and extended family at home would suffer, I reply by saying that as soon as I got settled abroad, I would arrange for my family to join me. Other financial problems at home would be taken care of through my regular remittance. Would

I then never think of going back home in the future? Not only until the situation in the country improves considerably, I would wonder, "and who expect to carry on with the task of national rehabilitation when the likes of me are all out of the country?"', those who messed up the country in the first place, I would argue and so on. This self-dialogue has been going on for the last ten years or so; Meanwhile, I am yet to leave the country. When I wonder how many people share my kind of mental experience, I realize that we must be very few for not many have the slightest opportunity of absconding from i.e; they do not have the place to run to, nor do they have the means of escape. Even among the elite who consider the possibility this possibility, the uncertainty of a future outside their father land intimidates. And so we all end up staying and mumbling.

1. To leave the country "for good" means leaving the country

- a. Unexpectedly
- b. For better opportunities
- c. Now that things are not very good
- d. Permanently

2. The expression "each striving to be recognized as being the most cogent" means

- a) Trying to prove its superiority
- b) Determined to prove that that it is most acceptable
- c) Resolved not to be dislodged
- d) Attempting to show it is the brightest

3. The writer's argument that it is foolhardy to offer one's service where such are apparently not required implies that in Nigeria,

- a) The authorities do not solicit for the services of the citizens.
- b) Mediocrity is the order of the day.
- c) The authorities are indifferent to offers of help from the citizens
- d) To offer to serve the country is dangerous.

4. The writer's posture as to who caused the problem in his country can be described as

- a) Indifferent c) self-righteous
- b) Unpatriotic d) logical

5. The last paragraph of the passage reveals that

- a) The writer is a member of the elite which alone indulges in his kind of thinking.
- b) People in the country only end up arguing among themselves while nobody does anything about the situation.
- c) The majority of citizens in the country does not possess the ability to argue the way the writer does.
- d) Deciding to leave the country is as bad as deciding to stay.

In this question 6— 10, choose the option nearest in meaning to the word or phrases underline

6. The Doctor insisted on giving

PROPHYLACTIC drugs.

- a. Curative b. Preventive

**ENGLISH LANGUAGE 2016 (UNTH)
COMPREHENSION I**

The financing of the university always be a vexatious problem not only because of the need tar it to maintain a level of Independence that allows for the thriving of Intellectual pursuit but also for the size of funding that is required to maintain an acceptable level of infrastructure m a modern university The experience of the Nigerian university In recent years has, in this regard, been almost alarming. The funding levels required constitute sufficient reasons for diversifying the sources. Even if government was in a position on its own to meet all of the university's financial requirements. I consider It desirable that every effort be made to reduce such contribution in the interest of university autonomy. I also hold the view that the university should seek to become dependent, in a substantial way, on

A GUIDE TO SCHOOL OF NURSING ENTRANCE EXAMINATION BY THE UNTH ICT GROUP
CHECK PAST QUESTIONS UPDATES AT WWW.UNTHPORTAL.COM

funds generated from within. In other words, the sources of funding of the university should be diversified as much as possible. Based on this principle, we can identify four sources.

Government, industry, students and individual philanthropists. I must add quickly that each source has its own set of problems in its continuing interaction with the university. which ought to be addressed here.

Of all the four major sources of financing university education mentioned above, contribution through fees from the students involves intricate issues of special concern. if government gives as an expression of its obligation to promote general welfare of society. if industry gives in order to enhance its chances of procurement of needed human, information and material resources , as well as enhance its social responsibility, if the general public gives as an Indication of voluntary support for a worthy social cause, students (and by inference, their parents) should give in order to purchase an economic good for meeting their own felt need in the expectation that they will be satisfied with the product purchased.

1. it is important for universities to be independent so that they can

- a) attract funds from industries
- b) determine their goals
- c) be left to expand without any hindrance
- d) carry out effective research.

2. The writer advocates for multiple sources of university funding in order to

- a) enhance university autonomy
- b) reduce dependence on the government
- c) ensure that the numerous needs of the
- d) maintain acceptance levels of Infrastructural development

3. The expression 'intricate issues of special concern' means

- a) Important policy statements
- b) Interwoven topics of significance

c) Complex matters requiring careful thought

d) Knotty problems that concern everybody

4. The word 'diversified', as used in the passage, means

- a) Differentiated b) Varied
- c) Diffused d) Widened

5. The source of university funding emphasized in the passage is

- a) Government b) Industry
- c) The general public d) Students

Choose the word opposite in Meaning to the underlined words

6, The teacher said that Bola's essay was full of many "redundant" details

- a) strange b) necessary
- c) useful d) unexplained
- e) useless

1 The "plaintiff" made very cogent submissions to the trial judge.

- a) Bailiff b) prosecutor
- c) Accused d) Defendant e) lawyer

8. Our teacher "seldom" comes late to school

- a) very often b) rarely
- c) Hardly ever d) infrequently

Choose the word nearest in Meaning to the words below

9. The law is often "tardy" in reacting to changing attitudes

- a) generous b) exclusive
- c) slow d) expensive

10. Frank and Mary ate "sumptuous" meals on their brother's wedding day

- a) foreign b) cheap
- c) insipid d) expensive

11. I think I'll like reiterate the points earlier made

5. A lady spends $\frac{1}{4}$ of her money on food and $\frac{1}{3}$ of her money Clothing and saves

the rest. If she saved N72,000 how much did she spend on food?

- a) N36,000 b) 43,200
 c) N48,000 d) N14,400

6.

Find the value of M?

- a. 10° b. 30° c. 12°
 d. 60°

7. What is the smallest numbers that when divided by 8 gives remainder 6 and when divided by 9 gives remainder 5?

- a. 384 b. 504 c. 70
 d. 437

8. The sum of 2 consecutive numbers give $\frac{5}{6}$ of their product. find the number?

- a. 3, 4 b. 2, 1 c. $-\frac{3}{5}$, 2
 d. 4, 1

9. A man is 3 times as old as his son. 12 yrs ago the man was 6 times older than the son. how old is the man and his son?

- a) 60 & 32 b) 78 & 26
 c) 948, 32- d) 78 & 30

10. Correct 401.504956 to 5 significant figures?

- a. 401.5 b) 401.51
 c) 401.505 d) 401.504

11. The survey of newspaper reader is 50.40 reads Sunshine, 30 reads Guardian. how many reads both?

- a) 20 b) 30 c) 15 d) 25

12. If $3\frac{1}{3x} + 2y = 3$ and $\frac{3}{2x} - 2y = 1$. Find $x+y$?

- a. 0 b) $\frac{11}{12}$ c) $2\frac{23}{24}$ d) $1\frac{1}{3}$

13. Perimeter of rectangle is 24cm and the area is 35cm^2 , how wide is the rectangle?

- a. 5 b. 7 c. 6 d. 8

14. Simplify $7x + 2y - 3x - 2y - 3$

- a) (2,3) b) $(\frac{-3}{5}, \frac{12}{5})$
 c. $(\frac{1}{2}, \frac{4}{5})$ d. $(\frac{-3}{5}, 2\frac{1}{10})$

15. A bag contains 20 red balls and blue balls. A ball is chosen at random. what is

probability that if colour is either red or blue?

- a. 0 b. 3 c. 1 d. 2

16. Convert to base ten 111001_{two}

- a. 40.6 b) 56 c) 44 d) 37

17. A spring which was 35cm long is stretched so that its length is increased by 16%. calculate its new length?

- a) 40.6 b) 35.7 c) 35 d) 41

18. The perimeter of a rectangle is 20m and the length is x m. find the area of the rectangle in terms of x ?

- a) $x - x^2$ b) $5x - 7x^2$ c) $2x - x^2$ d) $10x - x^2$

19. Town A is 61km north and 23km east of town B. Calculate the distance of A from B to the nearest O.P?

- a) 56.7 b) 64 c) 65.2 d) 65.23

20. A girl walks 6km at a speed of $4\frac{1}{2}$ km/h.!, how many minutes does take?

- a) 27 b) 45 c) 80 d) 120

OTHER SCHOOLS OF NURSING WRITTEN EXAM

ENGLISH LANGUAGE 2012

From the lists lettered A-I), choose the option which will be used to replace the phrases underlined in each of the following sentences.

1. We are going to **THE PLACE WHERE BOOKS ARE KEPT** to read for our examination.

- A. Store B. bookshop
C. library D. theatre

2. Our family doctor referred my son to **THE DOCTOR WHO SPECIALIZES IN THE CARE OF THE TEETH.**

- A. dentist B. Optician
C. Surgeon D. paediatrician

3. You should learn not to **BREAK IN ON** people's conversation.

- A. interrupt B. stop
C. interfere D. resist

Choose the word that is mostly nearly opposite in meaning in the underlisted word of groups of words that will at the same time correctly fill the gap in the sentence

4. Millions of lives are in danger of the attack of mosquitoes

- a. Risk b. chance
c. Safety d. jeopardy

5. The dutch planted quinine trees and established an almost complete control of the medicine from it

- a. Check b. Freedom

- c. Weakness d. Helplessness

6. We should begin to understand that these diseases have become endemic in our community

- a. internal b. external
c. personal d. environment

7. Malaria is under attack in Nigeria

- A. Defence B. Combat
C. encroach D. seize

8. Our nonchalant attitude to basic hygiene has resulted in many diseases in our families

- A. Indifferent B. negligent
C. Thoughtful D. unconcerned

9. We need the co-operation of every responsible citizen of this country to build a prosperous Nigeria.

- A. progressive B. successful
C. backward D. rich

From the words or group of words lettered A-D below in each of the following sentences. Choose a word or group of words that is nearest to the underlined words in the sentences.

10. The whole idea sounds preposterous

- A. ridiculous B. unnecessary
C. good D. welcome

11. We tried to negotiate, but they were Adamant

- a. Inflexible b. Clever

1. All the organelles have membranes except

- A. nucleus B. vacuole
C. cell membrane D. cell wall

2. The org constantly in touch with the liver are:

- A. pancreas, colon and caecum
B. duodenum and stomach
C. ileum, stomach and colon
D. stomach and gall bladder

3. A very poor growth in Plants and discoloration of leaves signifies the deficiency of

- A. Calcium B. magnesium
C. potassium D. manganese

4. Vitamin C which is water soluble is

- A. cobalamine B. pyridoxine
C. ascorbic acid D. riboflavin

5. Vitamin C deficiency results in

- A. rickets B. beri-beri
C. scurvy D. pellagra

6. A piece of yam weighing, 1.0gm was put into some salt solution. After 3 hours "if was removed and weighed. recorded weight was 1.2gms. this experiment shows that the

- A. a salt solution is more concentrated than the cell sap of the yam
B. cell sap of the yam is more concentrated than the salt solution

C. salt solution has the same concentration as the cell sap of the yam.

D. the yam lost some water molecules to the salt solution

7. A major reason why the blood cells can survive in the blood is that

- A. blood plasma and the red blood cells are isotonic
B. red blood cell are hypotonic to the plasma
C. the red blood cells are hypertonic to the plasma
D. the red blood cells received nutrients

8. Members of the vitamin B complex are

- A. water soluble B. fat soluble
C. water insoluble D. generally insoluble

9. During blood trfusion, agglutination could be prevented if a patient having blood group O is given blood from group

- a. AB b. A c. O d. B

10. Animal cells are different from plant cells because animal cell have

- A. definite cell wall B. large vacuole
C. Centrioles D. chloroplast

11. Which of these statements is true about finger prints patter?

- A. consistent for a life time
B- may be exactly the same for two individuals
C. prominent only at puberty

A GUIDE TO SCHOOL OF NURSING ENTRANCE EXAMINATION BY THE UNTH ICT GROUP
CHECK PAST QUESTIONS UPDATES AT WWW.UNTHPORTAL.COM

D. correlate with the individual blood group

12. Functions of red blood cells are to

A. engulf invading bacteria

B. aid in protein formation

C. transport oxygen to the cells

D. control blood glucose level

13. In which of the following processes in mammals is liquid passed from capillaries to Bowman's capsules?

A. filtration B. diffusion

C. osmosis D. re-absorption

14. The structure of the ear that is responsible for balance is the

A. semi-circular canal B. Pinna

C. auditory nerve D. Fenestral ovalis

15. When a person moves from a dark room into bright light, the pupils become

A. red B. large

C. white D. smaller

16. Good quality food will perform the following functions except

A. supplying energy

B. providing resistance against malaria

C. sustaining growth

D. maintaining health

17. When both ovaries of the human female ovulate simultaneously and both ova are fertilized, then

a. Identical

b. Fraternal twins are produced

c. Siamese twins are produced

d. The children produced are genetically identical

18. Which of the following juices contains the enzyme ptyalin

A. gastric juice B. pancreatic juice

C. Succus D. saliva

19. Which of the following statements about mutation is true

A. genotype is not affected

B. genotype is affected

C. the phenotype is not affected

D. it cannot be induced by artificial means

A. 2.0 moles B. 1.0 moles

C. 0.5 moles D. 0.25 moles

3. Which is a measure of the average kinetic energy of the molecules of a substance

A. volume b. Mass

C. pressure d. Temperature

4. The nucleus of the isotope tritium contains

A. two neutrons with no protons

B. one neutron and one proton

C. two neutrons and one proton

D. two neutrons, one protons and one electron

5. How many lone pairs of electrons are there on the central atom of the H_2O

a. 1 b.2 c.3 d.4

6. Which of these statements is true about Carbon(iv)oxide

A. it supports combustion

B. it is strongly acidic

C. it is very soluble in water

D. it supports the burning of magnesium to produce magnesium oxide

7. Which of the following gases dissolves in water vapour to produce acid rain during rainfall.

A. Oxygen B. Carbon(ii)oxide

C. Nitrogen D. Sulphur(iv)oxide

8. Which of these is an acid salt

A. $\text{K}_2\text{SO}_4 \cdot \text{Al}_2(\text{SO}_4)_3 \cdot 24\text{H}_2\text{O}$

B. $\text{CuCO}_3 \cdot \text{Cu}(\text{OH})_2$

C. NaHS

D. CaOCl_2

9. How many grams of, H_2SO_4 are necessary for the preparation of 0.175dm³ of 6.00m H_2SO_4

A. 206.0g

B. 103.0g

C. 98.1g

D. 51.5g

(S-32.06, O-16.00, H—1.00)

- C. necessary to melt the solid
 D. greater than the forces of attraction in both the solid and liquid phases

14. As the differences in electro negativity between bonded atoms increases, polarity of the bond

- A. decrease B. increases
 C. Remain the same D. reduces to zero

15. Which of the elements forms hydrides that are pyramidal structure

- A. iii B. iv C.v D. vi

16. Water can be identified by the use of

- A. anhydrous copper(ii) tetraoxosulphate(vi)
 B. anhydrous sodium trioxocarbonate(iv)
 C. potassium heptaoxochromate(vii)
 D. copper(ii)trioxocarbonate(iv)

17. Water has a rather high boiling point despite its low molecular mass because of the presence of

- A. hydrogen bonding B. covalent bonding
 C. ionic bonding D. metallic bonding

18. Argon is used in gas filled electric lamps because it helps to

- A. prevent the reduction of the lamp filaments
 B. prevents oxidation of the lamp filaments
 C. make the lamp filaments glow brightly
 D. keep the atmosphere in the lamp inert,

19. The air around a petroleum refinery is most likely to contain

- A. $\text{CO}_2\text{SO}_3\text{N}_2\text{O}$ B. $\text{CO}_2\text{CON}_2\text{O}$
 C. SO_2CONO_2 D. $\text{Pb}_3\text{H}_2\text{OCO}_2$

20. Which of these gases can be dried with concentrated H_2SO_4

- A. HBr B. H_2S
 C. NH_3 D. SO_2

PHYSICS 2012

1. In a resonance tube experiment, if the fundamental frequency of the vibrating air column is 208Hz, the frequency of the third overtone is 47k

- A. 70Hz B. 840Hz
 C. 1120Hz D. 1960Hz

2. How many grams of water at 17°C must be added to 42g of ice at 0°C to melt the ice completely

- A.200g B. 300g
 C. 320g D. 400g

3. A particle of mass 10-2kg is fixed to the tip of fan blade which rotates with angular velocity of 100 rad5-l, if the radius of the

A GUIDE TO SCHOOL OF NURSING ENTRANCE EXAMINATION BY THE UNTH ICT GROUP
CHECK PAST QUESTIONS UPDATES AT WWW.UNTHPORTAL.COM

radius of the blade is 0.2m, the central petal force is

- A. 2N B. 20N
C. 200N D. 400N

4. In a compound microscope,

- A. there is only one lens
B. the objective lens has a shorter focal length than eyepiece which is convex
C. the objective lens has a longer focal length than the eyepiece which is convex
D. the objective lens has a shorter focal length than the eyepieces are both convex and have the same focal lengths

5. The following types of waves are all transverse EXCEPT

- A. light wave B. radio waves
C. sound waves D. surface waves on water
E. x-rays

6. Which of the following statements is the law of universal gravitation? .

- A. any two bodies attract each other with a force which is proportional to the difference of their masses
B. any two bodies attract each other with a force which is inversely proportional to the square of the distance between them
C. any two bodies attract each other with a force which is proportional to the product of their masses and universally proportional to

the square of the distance between them

- D. any two bodies attract each other with a force which is directly proportional to the square of the distance between them
E. any two bodies attract each other with a force which is proportional to the sum of their masses

7. Which of the following does describe the image formed by a plane mirror?

- A. Erect B. laterally inverted
same
C. distance from mirror as object
D. magnified E. virtual

8. A vapour is said to be saturated when

- A. more molecules return to the molecule than leave it
B. a dynamic equilibrium exists between the liquid molecules and the vapour molecules at a given temperature
C. the vapour pressure is atmospheric
D. the temperature of the vapour varies

E. all molecules are moving with the same

9. The latent heat of fusion of a substance is the heat required to

- a. raise the temperature of unit mass of the substance by 1°C
b. maintain unit mass of the substance at constant temperature

A GUIDE TO SCHOOL OF NURSING ENTRANCE EXAMINATION BY THE UNTH ICT GROUP
CHECK PAST QUESTIONS UPDATES AT WWW.UNTHPORTAL.COM

- c. change unit mass of substance from solid to liquid at constant temperature
- d. the change unit mass of liquid to vapour at constant temperature
- e. Raise the temperature of unit mass by 100°C
10. The principle of the transmissibility of pressure in a liquids at rest in all direction is known as

A. Archimedes principle B. Floatation law

C. Pascal's law D. Newton's law E. Boyle's law

ENGLISH LANGUAGE 2013

Below the following passage are columns of words, select the correct alphabet A-E to answer questions 1-7 in the passage

Britain is 1 _____ (a) Repeatedly
(b) Commonly (c) Perpetually (d) Regularly
(e) Successfully regarded as 2 _____ (a)
Preferably (b) Powerfully (c) Predictably (d)
Critically (e) Predominantly. An
industrialization country. It is 3 _____ (a)
True (b) Sincere (c) Honest (d) Genuine (e)
Real that of its 48 million inhabitants
4 _____ (a) Seldom (b) Really (c) Hardly
(d) Quite (e) Completely. A million are

employed in agriculture; but only a tenth of its surface consists of urban areas and most of the 5 _____ (a) Remainder (b) Difference (c) Remnant (d) Overlap (e) Excess. (about 70% of the whole) is more or less 6 _____ (a) Suddenly (b) Plainly (c) Directly (d) Intuitively (e) Instinctively used for the 7 _____ (a) Manufacture (b) Production (c) Produce (d) Productivity (e) Accumulation of food.

Choose the word that is most nearly opposite to the underlined word that will at the same time, correctly fill the sentence.

8. Polygamy is very common in Africa, whereas the only acceptable form of marriage in Europe is

(a) Bigamy (b) Celibacy (c) Polyandry (d) Monogamy

9. The principal wants us to _____ motion, so don't oppose it

(a) Sustain (b) Support (c) Defame (d) Applaud (e) Deride

10. He denied that he never _____ committing the offence in his earlier statement.

(a) Admitted (b) Argued (c) Emphasize
(d) Negated (e) Colluded

11. The brevity of the guest-of-honour's address contrast with that of the chairman's opening remarks.

(a) Intense (b) Propense (c) Solid (d) Affined
(e) Verbose

16. Tunde says he always looks sober because there is nothing to be _____ about

MATHEMATICS 2013

The table below gives the distribution of marks obtained by a number of pupils in a class test

Marks	0	1	2	3	4	5
Frequency	4	7	12	18	11	8

Use the table to answer question 1-3

- The mean of the distribution is?
 a.3 b.5 c.8 d.18
- Find the median of the distribution?
 a.1 b.2 c.3 d.4
- How many pupils scored at least 2 marks?
 a. 12 b.23 c. 37 d. 49
- Three men John, James and Chris shared ₦500 in the ratio of 3:2 respectively. If john's share is ₦150, find the value of x?
 a. ₦5.00 b. ₦7.50
 c. ₦10.00 d. ₦10.00
- A pyramid of volume 120cm³ by 6cm. calculate the height of the pyramid.
 a. 5cm b. 9cm c.12cm d. 15cm
- A ladder 6cm long lean against a vertical wall at an angle of 53° to the horizontal. How high up the wall does the ladder reach?
 a. 3.611m b. 4.521m
 c.4.792m d. 7.962m

1. A plant which has a horizontal underground stem is

- (a) Rhizome (b) Corn
 (c) Creeper (d) Tube (e) Bulb

2. The hepatic portal vein is unique because it

- a- Carries deoxygenated blood
 b. Begins and ends with capillaries

c. Is the largest vein in mammals

d. Carries digested food

e. Is the shortest vein in mammals

3. The correct route for a bread eaten by a mammal is

a- Oral cavity — Oesophagus — stomach — ileum — rectum

b. Oral cavity — stomach — oesophagus — stomach ileum — rectum

c. Oral cavity — oesophagus — duodenum — stomach ileum — rectum

d. Oral cavity---oesophagus — ileum stomach r- duodenum — rectum

e. Oral cavity - oesophagus — stomach — ileum — duodenum — rectum

4. A-boy who is fond of swimming in a pond finds himself passing urine with traces of blood. He is likely to have contracted.

- (a) Schistosomiasis (b) Onchocerciasis
 (c) Poliomyelitis (d) salmonellosis

5. The easiest way to establish the level of pollution in a local stream is to measure the level of

- (a) Ammonia (b) Carbon(IV) Oxide
 (c) Oxygen (d) Alkalinity

6. Which of the following is a major cause of variation among organisms

- (a) Inbreeding b. Backcrossing
 c. Sexual reproduction d. Gene dominance

7. A health condition that is known to have resulted from gene mutation is

- (a) Sickle-cell anaemia (b) Colour blindness
(c) Haemophilia (d) Anaemia

8. During the dry season in the tropics the body metabolism of some mammals slows to a minimal level in a process referred to as

- a. Senescence b. Aestivation
c. Dormancy d. Hibernation

Use the information below to answer question 9-19

I. Test tube containing cane sugar and water

II. Test tube containing cane sugar and

III. Test tube containing cane sugar and its degrading enzyme

9. In which of the test tubes will glucose be detected after complete hydrolysis

- (a) I, II and III (b) I only
(c) I and II only (d) II and III only

10. The enzyme involved in the hydrolysis is

- (a) Erepsin (b) Maltase (c) Renin (d) Sucrose

11. Which of the following org regulates the level of waters, salts, hydrogen ions and urea in the mammal blood?

- (a) bladder (b) Colon (c) Liver (d) Kidney

12. Which of the following org gaseous exchange mechanism in a fish is _____

- a. Mouth → Operculum → Gills

b. Mouth → Gills → Operculum

c. Operculum → Gills → Mouth

d. Gills → Operculum → Mouth

13. An example of a filter-feeding animal is

- (a) Whale (b) Mosquito (c) Shark (d) Butterfly

14. Which of the following is a feature of the population pyramid of a developing country?

- (a) Low death rate long life span
(b) Short life span
(c) Long life span death rate
(d) Low birth rate

15. The interaction of community of organizations with its abiotic environment constitute

- a. Niche (b) a Microhabitat
(c) an ecosystem (d) a food chain

16. The vector of the malaria parasite is a

- (a) Male culex mosquito
(b) Female culex mosquito
(c) Female Aedes mosquito
(d) Female anopheles mosquito

17. Plant that show secondary growth are usually found among the

- (a) Thallophyte (b) Pteridophyte
(c) Monocotyledons (d) Dicotyledons

18. The fungi are a distinct group of eukaryotes mainly because they have

- (a) Spores

- (b) No chlorophyll
 (c) Many fruiting bodies
 (d) sexual and asexual reproduction
19. An animal body that can be cut along its axis in any plane to give two identical parts is said to be

- (a) Bilaterally (b) Symmetrical
 (c) Radially symmetrical
 (d) Asymmetrical (e) Symmetrical

20. The basking of Agama lizards in the sun is to

- a. Change the colour of their body
 b. Raise their body temperature to become active
 c. Fight to defend their territories
 d. Attract the female for courtship

gained weight and Z had become liquid, what conclusion could be drawn about the nature of the two salts?

- a) Z is efflorescent
- b) Y and Z are efflorescent'
- c) Y and Z are deliquescent
- d) Y and Z are hygroscopic
- e) Y is hygroscopic

9. Metals are malleable because they _____

- a) Are good conductors of heat
- b. Are good conductors of electric
- c. Can be beaten into sheets
- d. Can be alloyed
- e) Can be polished.

10. Chlorine is produced commercially by _____

- a) Electrolysis of dilute hexachloride
- b) Electrolysis of brine
- c) Neutralization of hydrogen chloride
- d) Heating Potassium hexachloride(V)

11. Which of the following Gases dissolve in water vapour to produce acid rain during rainfall?

- a) Oxygen b. Carbon (II) Oxide
- c) Nitrogen d) Sulphur (IV) Oxide

12. Water from town supply is chlorinated to make it free from

- a) Bad odour b) Bacteria
- c) Temporary hardness d) Permanent hardness

13. Which of the following is not a nitrogenous mixture

- a) Filtered sea water b) Soft drink
- c) Flood water d) Writing Ink

14. Trioxo-nitrate (IV) acid is a strong acid because it _____

- a) Is a mineral acid
- b) Is highly soluble in water
- c) Is concentrated
- d) Ionized completely in water

2. An air force jet flying with a speed of 335ms⁻¹ went past an anti-craft gun. How far is the aircraft 5s later when the gun was fired?

- a. 838m b. 3350m c. 670m
 d. 1675m e. 67m

3. A herdsman yelling out to fellow herdsman heard his voice reflected by a cliff 4s later. What is the velocity of sound in air if the cliff is 680m away?

- a. 170ms⁻¹ b. 136ms⁻¹ c. 340ms⁻¹
 d. 680ms⁻¹ e. 510ms⁻¹

4. Why is it impossible for the lines of force of an electric field to cross one another?

- a. Like charges repel each other
 b. a charged particle is deflected by an electric field
 c. Like charges are arranged on the same lines of force
 d. A positively charged particle can travel in only one direction at any time
 e. None of these is correct

5. An electric charge could be transmitted through

- a. Wood, rubber and stone
 b. Paper, clay and plastic
 c. Glass, acid and cloth
 d. The human body, water and metals
 e. All of the above.

6. In what range of temperature is the expansion of water anomalous?

- a) +2080c to + 212°c b) -80°c + 76°c
 c) -40°c to 0°c d) +96°c to + 100

7. How long will it take a 60kg man to climb a height of 22m if he expended energy at the rate of 0.25kw? (g ms⁻²)

- a) 5.3s b) 24.5s
 c) 41.6s d) 52.8s

8. If a wheel 1.2m in diameter rotates at one revolution per second. calculate the velocity of the wheel

- a) 3.6ms⁻¹ b) 3.8ms⁻¹
 c) 4.0ms⁻¹ d) 7.5ms⁻¹

9. Counting of currency notes with moist fingers is based on the principle of

- a) Diffusion b) Cohesion
 c) Adhesion d) Viscosity

10. During summer, the balance wheel of a clock expands. What effect does this have on the accuracy of the clock?

- a) The clock gains time
 b) The accuracy of the clock is not affected
 c) The clock loses time
 d) The clock stop working.

11. I Mass, II Density, III Temperature, IV Nature of Substance. Which of the above affect diffusion?

- a) I, II and IV only
 b) II, III and IV only
 c) I, II, III and IV

d) I and II only

12. A clinical thermometer is different from other mercury in glass thermometer owing to _____

a) Its long stem

b) The constriction of its stem

c) Its wide range of temperature

d), The grade of mercury used it

OTHER SCHOOLS OF NURSING WRITTEN EXAMS 2014

ENGLISH LANGUAGE

Read the following passage carefully and answer the questions that follow by circling the alphabet with the most correct answer.

It is customary nowadays among fashionable ladies and gentlemen to acquire strange and sometimes quaint clothes scarcely ever used. Sometimes it may be an approaching festival. Sometimes a two hour ceremony and sometimes to honour a dead colleague.

This has triggered Off a modem craze. And so, people who just occupy small apartments in their homes, or have one room in a densely-populated home find that more than two third of their rooms are filled with bongo trousers which they cannot wear, worn out je which

stink or specially made clothes for occasions that are not recurrent.

Although plagued with the problem of school fees for their children, parents have had to swallow their own phlegm and humour because of their children who need special clothes for events. Newly employed youths soon find that their comrades are getting married, and a new and special attire must be used to grace the occasion. University students see matriculation ceremonies or induction ceremonies into clubs as special reasons to make new attire which you may be sure they would not wear on another occasion that parallels the one for which these clothes were made.

Medical doctors may soon find another cause for the incidence of high blood pressure among the youth. The desire to acquire new clothes is one strong possible cause, but a more subtle one which haunts like a ghost is the problem of choice of what to wear. The youths have stuffed their apartments, wardrobes, drawers and trunks with so many clothes that the greatest problem they face is the choice of what to wear.

I. Suitable title for this passage is

a) Fashion craze

b. Fashion crase among youths

c. University students and induction ceremonies

d. Parents and money for fashion craze

2. In this passage, the expression that parents have had to swallow their own phlegm means parents,

- a) Had to swallow the sputum in their mouth
- b) Had been phlegmatic all along
- c) Have had their own pride or prejudice
- d) No longer have to swallow their own phlegm

3. The youth acquire clothes for

- a) Burial, great occasions or for matriculation ceremonies
- b) Occasions that are not recurrent
- c) Boosting their ego
- d) The purpose of praising their parents

4. In this passage, we learnt that parents

- a. Admire their children's craze for new clothes
- b) Do not provide the money for the fashion craze
- c) Endure a lot of hardship to provide for their children
- d) Gladly provide the money for their fashion craze

5. A likely for high blood pressure among youths is

- a) The clothes to parties
- b) The different clothes are meant for different occasion
- c) youths have stuffed their wardrobes, apartment and drawers, with new clothes.

d) The thought of the choice of what to wear

In questions 6 to 15, choose the option opposite in meaning to the words underlined.

6. Mr Jack was most **FLEXIBLE** in his instructions.

- a) Rigid b) correct
- c) stiff d) upright

7. The university has offered **TEMPORARY** accommodation to its staff

- a) Popular b. Permanent
- c) recognised d) regular

8. Mary complained that she slept on a **COARSE** floor.

- a) Smooth b) rough
- c) bad d) harsh

9. Jim was one of the **SPECTATORS** at the concert

- a) Ushers b) judges
- c) guests d) performers

10. The governor **DECLINED** to give audience to the journalist.

- a) Ignored b) accepted
- c) forgot d) rejected

11. The debtor's husband is **LIABLE** for his wife's debts.

- a) Unwarrantable b) responsible
- c) unquestionable d) accountable

- a. 25cm b. 65cm²
 c. 120cm² d. 156cm²

6. A chord of a circle subtends an angle of 60° at the centre of a circle of radius 14cm. Find the length of the chord

- a. 7cm b. 14cm c. 21cm d. 28cm

7. A man invested N5,000 for 9 months at 4%.

What is the simple interest?

- a. N150 b. N220 c. N130 d. N250

8. Express 123456 to 3 significant figures

- a. 123,000 b. 124,000
c. 125,000 d. 126,000

9. Find the principle which amounts to N5500 at simple interest in 5 years at 5% per annum

- a. 22,000 b. 13,000
c. 44,000 d. 25,000

10. Evaluate $21.05347 - 1.6324 \times 0.43$ to 3 decimal places

- a. 20,980 b. 20,351
c. 20,981 d. 20,352

ANSWERS

1. D 2. D 3. C 4. A 5. -
6. B 7. A 8. B 9. A 10. D

BIOLOGY 2014

1. A group of closely related organisms capable of interbreeding to produce fertile offspring are known as a member of a

- (a) Kingdom (b) Class
(c) Family (d) Species

2. An animal which is active during the

- (a) Nocturnal animal
(b) Diurnal animal

(c) Terrestrial animal

(d) Homoeothermic animal

3. Which of the following organisms is a primary consumer?

- (a) Dog (b) Sheep
(c) Grass (d) Fungus

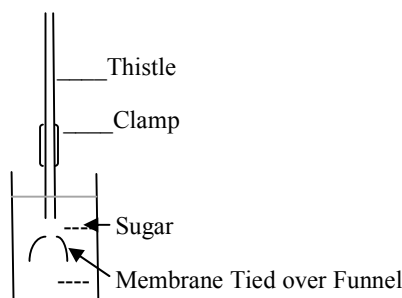

4. A species whose population has become so small that it may become extinct if not protected is a/an

- (a) Special species (b) Dangerous species
(c) Endangered species, (d) Important species

5. The outward appearance of an organism is referred to as:

- (a) Phenotype b. Genotype
(c) Dominance (d) Recessiveness

Use the diagram below to answer questions 6-8

6. After an hour, the level of water in the thistle funnel will:

- (a) Rise (b) fall
(c) Remain the same (d) Double

7. The experiment above is used to demonstrate the process of

A GUIDE TO SCHOOL OF NURSING ENTRANCE EXAMINATION BY THE UNTH ICT GROUP

- (a) Respiration (b) Water culture (a) Cochlea and the auditory nerve
 (c) Diffusion (d) Osmosis (b) Cochlea and brain
8. In plant cell the role of the membrane is played by the
 (a) Nucleolus (b) Cell wall
 (c) Cytoplasm (d) Mitochondrion
9. Red blood cells were found to have burst open after being placed in distilled water for an hour, the phenomenon is known as:
 (a) Plasmolysis (b) Diffusion
 (c) Hemolysis (d) Wilting
10. Which of the following organisms is not classified as an animal?
 (a) Amoeba (b) Paramecium
 (c) Euglena (d) Obelia
11. The excretory system in mammals consists of the following parts except
 (a) Two Kidneys (b) Two ureters
 (c) Two bladders (d) One urethra
12. The inorganic components of bone consist of:
 (a) Magnesium, sodium and calcium
 (b) Magnesium, phosphorus and calcium
 (c) Sodium, phosphorus and calcium
 (d) Potassium, magnesium and Calcium
13. The relationship between the retina and the brain is similar to that between the
 (a) Cochlea and the auditory nerve
 (b) Cochlea and brain
 (c) Cochlea and the semi-circular Canals
 (d) Eardrum and the brain
14. Rural-urban migration in developing countries can be prevented by
 (a) Increasing the number of years in school
 (b) Putting up more factories in urban areas
 (c) Having boarding schools in rural areas
 (d) Even distribution facilities in both regions
15. A person with blood O can be given blood from persons who have blood belonging to:
 (a) Group O only (b) Group A only
 (c) Groups A and O (d) Groups A, B and O
16. Which of the following statements about heredity is not true. In heredity the traits are:
 (a) Carried by genes
 (b) Contained in the ovum and sperm
 (c) Always transmitted by one parent
 (d) Transmitted from parents to offspring
17. The branch of Biology that deals with the principles of classification of organisms is known as
 (a) Biological index (b) Nomenclature
 (c) Taxonomy (d) Ecology
18. Which of the following pairs of cells carry out the same function?

- (a) Check cell and red blood cell
(b) Spermatozoan and ovum
(c) Palisade cell and epidermal cell
(d) Root tip cell and guard cell
19. A monocot root is different from a dicot root by having
- (a) Endoderm (b) Cambium
(c) Wide pith (d) Root hair
20. Which of the following statements best describes haemoglobin? It is
- (a) Yellowish in colour
(b) A red blood cell
(c) An oxygen carrying pigment
(d) Needed for blood clotting

CHEMISTRY 2014

1. 70cm^3 of hydrogen are sparked with 25cm^3 of oxygen at S.T.P, the total volume of the residual gas is
- a. 20cm^3 b. 35cm^3
c. 45cm^3 d. 25cm^3

2. A solution X on mixing with AgNO_3 solution gives a white precipitate soluble in NH_3 . A solution Y when added to X also gives a white precipitate which is soluble on boiling solution Y contains
- a. Ag^+ b. Pb^{2+} c. Pb^{4+} d. Zn
3. Which of the following statement is an exception in the assumptions of the Kinetic theory of gases
- a) The particles are of negligible size
b) The particles are in constant random motion
c) The particles are of negligible mass
d) The particles collide with each other
4. A liquid begins to boil when
- a) Its volume is slightly decreased
b) Its volume pressure is lower than the external pressure
c) Its vapour pressure equals the external pressure
d) Its molecules start escaping from the surface
5. An element which exists in more than one crystalline form is said to exhibit

- a) Polymorphism b) Isotopy
c) Allotropy (d) isomerism
6. Which of the following is an example of a chemical change
- a) Freezing of water
b) Dissolution of NaCl in water
c) Rusting of Iron

d) Separating a liquid mixture by distillation

7. Calculate the relative molecular mass of limestone CaCO_3 (Ca=40, C=12, O=16)

a) 60 (b)80 (c)120 d.100

8. Which of the following is correct of the scientists that explained the properties of atom

I. Faraday Newton's model of Atom

II. Bohr model of Atom

III. Thomsom's model of Atom

IV. Rutherford's model of Atom

a. II, IV, III b. II,I,III

c.I, III, IV D. All of the above

9. A certain amount of gas occupies 5.0dm³ at 2atm and 10°C. Calculate the number of moles present

(R=0.082 at dm³K¹Mol¹)

a) 0.43 moles b) 21.32moles

c) 0.33moles d. 2.32moles

10. Inorganic/organic acids can be used in the manufacture of soap by a process called -

a. Esterification b. Saponification

c. Hydrolysis d. Saopinification

2014 ANSWERS

1.Bonus 2.C 3.C 4.C 5.C

6.C 7.D 8.B 9.A 10.B

PHYSICS 2014

1. one common characteristic of solids, liquids and gases is that

a) All the three have fived volume

b) Their molecules have the same size

c) Their moleéules are always in motion

d. All the three have the same intermolecular forces.

2. Local action is normally prevented in a simple electric cell by

a) Introducing an oxidizing agent in the acid.

b) Not drawing current continuously for long periods.

c) Arnalgamating the surface of the zinc plate from acid.

d. Using a porous pot to isolate the zinc plate from acid

3. Which of the following instruments is not a wind instruments?

a) Clarinet b) Saxophone

c. Trumpet d. Xylophone

4. If the radioactive atom emits a beta particle, its mass number

a) Increases by one

b) Remains the same

c) Decreases by one motion

d) Increases by one

5. When light falls on a metallic surface, the number of electrons that may be emitted would depend solely on the-----

- a) Area of the metallic surface
- b) Frequency on the light
- c) Intensity of the light
- d) Time of exposure of the metallic surface of light.

6. Which of the following phenomenon is the practical evidence of the continual motion of molecules?

- a) Trlational motion b) Rotational motion
- c) Brownian motion d) Oscillatory motion

7. A body starts from rest and accelerates uniformly at 5ms^{-2} until it attains a velocity of 25ms^{-1} . Calculate the time taken to attain this velocity.

- a) 2.5s b) 5.0s
- c) 10.0 d) 125.0s

8. A rectangular block of dimensions $2.0\text{m} \times 1.0\text{M} \times 0.5\text{m}$ weighs 200N . Calculate the maximum pressure exerted by the block on a horizontal floor

- a) 100Nm^{-2} b) 200Nm^{-2}
- c) 300Nm^{-2} d) 400Nm^{-2}

9. A very sensitive spring balance was used to determine the weight of an object at the North Pole when the same spring balance was used to measure the weight of the same object at the equator, it was found to reduce. The explanation for this observation is that

- a) It is very hot at the equator
- b) The spring balance has expanded
- c) The acceleration of free all due to gravity varies with locations
- d) The mass of the body is reduced

10. A ball is dropped and it hits the floor at a _____

- a) It rebounds upwards to a point
- b) White moving from A to B its
- c) Potential energy is decreasing
- d) Kinetic energy remains constant
- e) Potential energy is increasing

11. The design of the thermostat of an electric iron is based on

- a. Emission of electrons from metals when heated
- b. Increase in the density of metals when heated
- c. Change in the mass of metals when heated

12. Capacitors are used in the following devices except

- a) Water pumping machines b) Ceiling fan
- c) Electric irons d) Television sets

13. A positively charged glass rod is placed near the cap of a positively charged electroscope. The divergence of the leaf is observed to

- a) Remain the same b) Increase
- c) Decrease d) Equal to zero

 ENGLISH LANGUAGE 2016**

Choose the word that best complete the meaning in the sentence

1. The door handle was shaky because the screws had _____

- a) Lost b) Loosed
 c) Losed d) Loosened

2. The lower pleaded with the judge to _____ justice with mercy

- a) Tempar b) Temer
 c) Temper d) Tapers

3. After Uju had made the bed, she _____ on it

- a) Layed b) Laid c) Lied d) Lay

4. Ngozi said that her chicken _____ eggs yesterday afternoon

- a) Layed b) Lied c) Laid d) Lain

5. Everybody knows that _____ should return the, gown after the matriculation

- a) He b) They
 c) He or She d) They all

From the word latter A-D below in each of the following sentence choose a word that is nearest in meaning to the underlined word.

6. Because more reliable evidence is needed to prosecute the case, it is now in abeyance

- a) Court record b) Suspension
 c) Privacy d) Secret

7. The stockbroker said it was an Astute move to sell the shares then.

- a. Bad b. A Shrewd
 c) An unprofitable d) An insincere

8. Jerry look rather furtive to Shola

- A. Intoxicated B. Unfriendly

- C) Sad D) Sly

9. The lecturer delivered his speech extempore

- A. Out-of-hand B. Of the cuff
 C) accurately D) courageously

From the word lettered A-D choose the Opposite in meaning to the underlined words

10. The athlete is proud to be in the vanguard of sports development.

- A. Leading position B. Lagging position
 C. Destructive position D. Unforgettable position

11. The Plebs can be found in every society of the words.

A. Eliter
class

B. Middle

a) $m + n - 1000$

b) $m + n: 1800$

c) $m + n 800$

d) $m - 112800$

C) Politicians

D) Masses

3. Factorise $2x^2 - x - 45$

12. Otokpa took after his late father who was a teetotaler

a. $(x+5)(2x+3)$

b. $(x+5)(2x+9)$

A. Disciplinarian

B. A Drunkard

c. $(2x-10)(9x-45)$

d. $(x-1)(x+5)$

C) Sober

D) Careless

4. Evaluate $x(a-c) + y(a-c)$

13. The journalist said he was working freelance

a) $(x+y)(a-c)$

b) $(a+c)(x-y)$

c) $a(x+y-c)$

d) $(a-x)(c-y)$

A. Without a pay

B. Dependently

5. Solve $0.0425 + 2.5$ to 2 d.p.

C. Tirelessly

D. Satisfactory

a) 2.5425

b) 2.542

14. The report of the committee contained a plethora of details

c) 2.54

d) 2.543

A. Simplicity

B. Spectrum

6. Solve for the smallest value of x in the quadratic equation $x^2 + 2x - 3 = 0$

C. Multitude

D. Shortage

a. $x = 1$

b. $x = 3$

c. $x = -1$

d. $x = -3$

7. A man sold a book a profit of 50%. How much was the cost price of the book?

a) N300

b) N600

b) N900

d) N650

8. Evaluate $10^1 - 2.8 \times 10^{-1}$

a. 2×10^1

b. 2×10^{-1}

c. 1.8×10^2

d. 2×10^{-2}

9. Simplify $\sqrt{20x(\sqrt{5})^2}$

a. $\sqrt{2}$

b. $10\sqrt{2}$

c. $.10\sqrt{5}$

d. $.5\sqrt{2}$

BIOLOGY 2016

1. In an Eco-system plants tend to prevent overcrowding by means of efficient?

- a) water uptake b. seed germination
c) pollination d. seed dispersal

2. Which of the following is true of commensalism?

- A. One organism gains and the other loses
B. One organism gains and the other neither gain nor loss
C. Both organisms gain
D. None of the organisms gain

3. Pancreas secretes which of the following enzymes

- A. Lipase, Amylase and trypsin
B. Ptyalin, rennin and pepsin
C. Ptyalin, Amylase and Renin
D. Lipase, Ptyalin and Trypsin

4. Paternity dispute can most accurately be resolved through the use of?

- a. DNA analysis
B) Blood group typing
C) Finger print
D) Tongue Cattle.

5. Testes in the male reproductive system is same as what is present?

- A. Pollen grain b) Anther
C) Stigma d. Cattle

6. Agglutination in a person with blood group O can be prevented through which of the following?

- A, Receiving blood from group AB
B, Receiving blood from group A
C. Receiving blood from group O
D Receiving blood from group B

7. Which of the following animals respire through skin.

- A. Fish B) Earthworm
C) Cockroach D) Lizard

8. What will happen when two pieces of unripened pawpaw labeled X & Y dropped into equal volumes of concentrated salt and distilled water respectively

- A. Pawpaw X will become turgid
B. Both will increase in size
C. Pawpaw Y will become turgid
D. Both will decrease in size

9. Identical twins inherit their genes from

- A. Different egg and sperm
B. The same egg and sperm
C. Two eggs and a sperm
d). One egg and two sperms

10. Which of the following is/are present in the gene

- A. DNA
B. RNA, DNA & Protein
C. RNA
D. DNA & RNA

11. The black fly is a vector of

- A. Yellow fever B. Onchocerciasis
C. Trypanosomiasis D. Malaria

12. The causative agent of typhoid fever is

- A. Shigella B. Salmonella
C. Escherichia D. Entamoeba

13. The abiotic factor which does not affect the distribution and abundance of organisms in a terrestrial habitat is

- A. Light B. Turbidity
C. Temperature D. Edaphic

14. The Rhesus factor of blood was first identified in a category of

1. Detergents have the formula
- a. $R(CH_2)_8OH$ B) RSO_3Na
 C. RCO_2NA D) RCO_2H
2. When calcium hydroxide is added in the treatment of town water supply to
- A. kill bacteria in water
 B. Facilitate coagulation of organic particle
 C. Facilitate sedimentation
 D. Improve the taste of the water
3. Mortar is not used in under water construction because
- A. It hardens by loss of water
 B. It hardening does not depend upon evaporation
 C. It requires concrete to harden
 D. It will be washed away by the flow of water.
4. Water has a rather high boiling point despite its low molar mass because of the presence of
- A. Hydrogen bond B) Ionic bond
 C. Covalent Bond D) Metallic bond

5. At 25°C and 1 atm, a gas occupies a volume of 1.50 dm³. What volume will it occupy at 100°C and 1 atm
- A. 1.86 dm³ C) 18.50 dm³
 B. 6.00 dm³ D) 60.00 dm³
6. The role of sodium chloride in preparation of Soap is to
- A. Purify the soap
 B. Separate the soap from glycerol
 C. Accelerate the composition of fat or oil
 D. React with glycerol
7. Given that 15.00 cm³ of H_2SO_4 was required to completely neutralize 25.00 cm³ of 0.125 mol/dm³ NaOH, Calculate the molar Concentration of the acid solution*

- A. 0.925 mol/dm³ C) 0.104 mol/dm³
 B. 0.156 mol/dm³ D) 0.023 mol/dm³
8. In the conductance of aqueous potassium tetraoxosulphate(VI) solution, the current carriers are
- A. ions B. Electrons
 c. Hydrated ions D) Hydrated electron
9. $2FeCl_{2(s)} + Cl_2 \rightarrow 2FeCl_{3(s)}$. The reducing agent in the reaction is
- A. $FeCl_2$ B) Cl_2 C. $FeCl_3$ D) Fe
10. One of the advantages over soap is that detergents
- A. Are more easy to manufacture
 B. Foam more than soap
 C. Form soluble salt with hard water
 D. Are able to deter germs more than soap

PHYSICS 2016**

1. Which of the following is surface tension greater
 - a. oily water
 - b. hot water
 - c. water with detergent
 - d. salt water
2. The Iris of the human eye is likened to what in a camera
 - a. diaphragm
 - b. lens
 - c. film
 - d. shutter
3. A ball was falling freely from a height of 25cm. It finally fall on the top of a roof of a building which is 5cm high. If the acceleration due to gravity is 10ms^{-1} , find the velocity
 - A. 24ms^{-1}
 - B) 2ms^{-1}
 - C. 4ms^{-1}
 - D. 400ms^{-1}
4. Which of the following formular is correct of calculating wave particles
 - a. $\lambda=f/v$
 - b. $f=\lambda/v$
 - c. $f= v/\lambda$
5. The quantity of heat needed to raise the temperature of a body by 1kelvin is the bodies
 - A. Heat capacity
 - B) Internal heat q,
 - C. Latent heat
 - D) Specific beat capacity
6. Images formed by a pinhole camera are
 - A. Inverted
 - B) Magnified
 - C. Upright
 - D. Real
7. The characteristic, of an image formed by a plane mirror is
 - A. Diminished
 - B.Real
 - C. Caught on the screen.
 - D. laterally inverted

8. The unit of moment of a couple can be expressed in
 - a) Nm^{-1}
 - b) Nm
 - c. Nm^{-2}
 - d. Nm^2
9. Which of the following unit is not among the fundamental units
 - A. Kelvin
 - B) Radian
 - C) Meter
 - D) Mass
10. Which of the following is not a scalar quantity
 - A. Electric field
 - B) Electric Potential
 - C. Speed
 - D) Energy
11. A man weighing 50kg, climbs up a staircase o height 20m in 5seconds. Calculate his power?
 - a) 2500
 - b) 3000
 - c) 300
 - d) 2000
12. Longitudinal wave can be differentiated from transverse wave because of which of the following features
 - A. Polarization
 - B) Diffraction
 - C. Reflection
 - d) Compression.
